his last post only one that day was the night I posted about my first
eme contact I wonder if his mind has just collapsed haveing to face the
idea I a mere tech with no interest or attitude for CW can in fact do
that mode

I don't care if he is in therapy or what aslong as he has gone and he
seems to have Mr slow code with and mr klein with him

you do not post correctly you lie and misrepresent the fact that you
claim misspelling is proof of inferioity is amoug your dishonorable
untruth If mispelling were proof of stupdity then Albert Einstain would
be reckoned one of the dumbest men on earth
...
It is not only your misspelled and awkward posts that brand you as stupid,
but your insatiable drive to respond to each and every post made whether you
know the person or not. You, Mark, simply do not know when to leave well
enough alone. It has been documented that you made over 800 and perhaps 900
posts (using sockpuppets) in June alone. Is this the watermark of an
intellectual giant? You post idiotic, third grade level one-liners day after
day after day while at the same time saying nothing. You, Mark, are the sum
of your posts and one can, and must, draw the conclusion that you are not
overly bright. I misrepresent nothing and have not lied. I DO post correctly
and any attempt by you, a nonentity, to judge or malign me is of no
consequence and has absolutely no merit. You, of all people, certainly have
no room to pass judgment.
...

the inablity to reconize the diefferent between statements like "it
would take killing you to stop you from posting" and what would be a
true death threat "I will post stop you from posting by any means
neccasary. Indeed thatI use langauge better than ost of you is clear
proof I am not any of your inferior
...

Aw, garsh. Did someone actually post such comments or did you twist them to suit your purposes? If such comments were made then perhaps, just perhaps, they stemmed from your constant flooding of the groups with your juvenile drivel. Has it not yet dawned upon you, Mark, that you are one of the least popular posters hereabout? You rank only one half step below the most reviled poster of all time, that being Roger Wiseman.
And Mark, your delusion "thatI use langauge better than ost of you " is just that...a delusion. 800 misspelled posts in a single month quickly lay that claim to rest. You clearly DO have mental superiors in these groups and they are many. You are not as intellectually gifted as you like to comport yourself to be. We all have mental superiors and I just happen to be one of yours. I am not bragging...it is merely how life is. Learn to live with it, Mark.

PS: Thanks for the comedic relief. Who the heck is "Albert Einstain"? Is that the chubby little Cosby kid whose clothing was always food-stained and dirty?

Geeze, Brain...Just like you to lament the state of the
newsgroup, find fault with others for it's "condition", then pop in
with completely off topic, unrelated, inflamatory mudslinging.

Why am I not surprised?

Perhaps it's because I've had you pegged right for years now and
nothing you've done or said has contradicted that opinion or proven me
wrong yet.

You're the little two-faced worm with absolutley nothing to
contribute to any Amateur Radio related topic...Well..Let me change
that slightly and say nothing ACCURATE about any Amateur Radio related
topic.

Speaking of which, seems recent events in both Amateur Radio AND
the MARS programs bear out my many contentions and have let your rants
in the trashcan.

How do you explain that?

Mork, I've never called you a "mere tech" at any time, nor did I doubt that you have other interests in Amateur Radio than "legacy modes" such as Morse Code.

What is obvious is that you've made one rediculous claim after another and have even bragged about your chronic lying. I have

There's not one iota of doubt in my mind that your EME contact is yet another of your unsubstantiated claims.

Until we see a QSL card from the other station posted, your EME claim will go right onto the pile with "I am a Colonel", "I am a Veteran", "I am married", "I have a 248 IQ", "I have three college degrees", "I am a business owner", etc etc etc.

Don't point fingers at me and cry "libel" or "I am a victim", Mork...

It's YOUR pattern of lying then bragging about lying that's earned you such trust.

Who is "Maj Roesnon" and WHAT >>>SOLID EVIDENCE<<< has he or she
refused to accept, Mork?

You've provided NOTHING.

No proof of your military service.

No proof of your commision in the United States Army.

No proof of your "business".

No proof of your "marriage".

No proof of your MULTIPLE college degrees.

Nothing.

The ONLY "proof" of any kind we have from you is your
grammatically fractured, misspelled, and frequent acknowledgements of
your belief in lying as a morally correct and reasonable thing to
do...And your name appears in the FCC database. Congratulations.

There's no fraud here, Mork, other than your attempt to use a
call-forwarded number to a sockpuppet of yours to perpetuate your
tales.

Here's the PROOF you need to submit: A PICTURE of you and your
"Mrs" holding hands, a CURRENT copy of USA Today to validate the date,
and a sign in her hand stating that she IS your wife.

> indeed he attacks me for providing the lead in the first place

I "attack" you for proving that you're a liar?

That's NOT an "attack", Mork. That's the truth.

First of all, Morkie, I never "published" any such thing.

Secondly, I have been telling YOU for WEEKS what you need to do to prove your allegations: TAKE THE PICTURE.

This suggestion of yours to use a call-forwarded number is a last minute dodge on your part to try and re-direct the fact that YOU have been caught in yet another lie.

I didn't "accuse" you, Mork...I caught you!

> he claims then he will stop harrassing me (and then denies he has ever

How can I "harass" you about your "wife" if YOU provide a valid photo that PROVES your allegeations, Mork?

The fact that you haven't done so simply PROVES that I am right.

Harken back a few months, Mark. It was Roger who made the post threatening to send your posts to your father-in-law. You even asked him why he'd want to do that to an elderly man.
There were no "confederates", merely Wiseman getting under your thin skin. Again, as you often do, you have either forgotten the facts or, more likely, are lying to suit your own purposes.
In short, Mark, you are a liar. A bold-faced, underhanded liar. How about telling the truth once in a while? Not that you can....

What false claim, Morkie?

You DO have "intelectual superoirs" in this newsgroup.

Mostly they are the one's who spell it "intellectual superiors",
which is the correct spelling.

Had you attended even ONE of the college programs you allege (or
even graduated a decent high school program), you'd know that.

To be completely fair, I have three addy's in this forum, but you
are absolutely correct that they are my real name and call sign.

No derivisions of dead childrens memories or make believe "Upper

Well, Morkie is nothing if not ignorable...As he should be.

As for his gender-bending rants, he's been told over and over that
if he'd stop making an issue of it and stop responding to it, it WOULD
eventually stop.

However he keeps throwing more-and-more fuel on that fire, and the
results are predictable.

There's not one ounce of ink spent in any of the "legitimate"
media that even remotely supports Morkie's contentions, and none of it
here.

However he takes any reference to himself, by virtue of the fact
that he does only hold the Technician-class license, as part of this
imaginary, rediculous crusade that he refers to.

Just more proof of his delusionla character as far as I am
concerned.

Lately Morkie has taken to "granting forgiveness"...A god-complex
if I ever saw one.

Between that and his suggestions that he's "persuing justice for
all", I'd say he's got a real bad Super-Hero-Wannabe complex that needs
to be dealt with.

Ahhhhhhhhhhhhhhh....More "I Am A Victim" whining.

"Getting used to" being an idiot was what your parents and
teachers did to you, Mork. For you it's just a learned characteristic.

Dyslexia is treatable.

Using a spellchecker is the first step in this media.

You know this but refuse to do it. That makes you an idiot.

> That, Mark, is an excuse. There are many of your peers who have overcome

Hear, hear.

Tom Cruise has openly spoke of his own dyslexia and the chalenges
it imposed, but HE took the steps to overcome it.

Morkie can't step over a pile of dog doo.

Forget common sense, "666"...That's as foreign to Morkie as
English is.

> > you are a cowwrd and clearly without honor

This from the guy who spent more than a year insisting that he was
a Colonel in the United States Army, who uses the memory of dead
children to fight his newsgroup battles, and continues to use deceit
and dishonor as tools of those "fights".
...
> Was that supposed to cut to the core of my being? Upset me? Send me crying?

Morkie's been told by numerous people that fixing his grammar
might actaully put him in a position to say something meaningful that
people might actually respect, however he'd rather keep his image as
Court Jester.

I am sure he does, considering his recent propensity for granting
"forgiveness".

the number was rpoided by WISEMEN not an ally of mine further you could
look it up yourself

you just refuse to do the legwork

because you are a lazy bum

yes you and you confederates did, (wisemen is your coconspritor)
you publish his name and address yourself wwismen added the number

more blatant lies Robeson

you have for week been trying to obtain materail that you and your
confederates can use for further harrassment I refuse to provide that
and instaed offer you proof of a kind that does NOT allow you to
further invade our privacy

you have been threatening to produce photos of me for a year now
If you can provide a real photo then you you KNOW she is female

particularly if you catch her swimingin the pool she is fond of skinny
dipping in our pool

you would be admiting that I am not fat either another of your lies

but the facts are you lack access to us

to 666 I am persuing justice indeed MY ENTIRE carrer in RRAP is one
long persuit of JUSTICE. I referr you that Peom t"they came for the
JEWs and I was not a jew .. something like that

coment to do are due in opposition to hate and paranoia and bigtry
where ever I find them

the only type I am not trying to is the sick anti Islamic stuff (simply
too much of it for me it saddens me to have have let that go but it is
a wind no tree can stand in)

the effectiveness of the prusuit is another matter

Robeson I am big enough secure enough in MY ego to forgive even you
although It would be nice if you did not pussh that quaility of mine so
much

It is in the power of Every MAN (or woman) to grant forgiveness that
you seem to think it is reservsed solely for God shows several things

one that you are an Unforigiving bully

ah yes Maj small minded Robsen I do persue justice for all as should
you if you were Christian as you imply

I preform my Duty as Human being to do what I can in that effort

Those efforts are of course limited by my status as a Mortal

You'll be roasting in hell, queer:

Marqueer's Message From Hell
"Then he said, I pray thee therefore, father, that thou wouldest send him to my father's house: For I have five brethren; that he may testify

unto them, lest they come into this place of torment. Abraham saith unto him, They have Moses and the prophets; let them hear them. And he said, Nay, father Abraham: but if one went unto them from the dead, they will repent. And he said unto him, If they hear not Moses and the prophets, neither will they be persuaded, though one rose from the dead." Luke 16:27-31. Listen to Moses and the prophets:
"Thou shalt not lie with mankind, as with womankind: it is abomination." Leviticus 18:22.

"Hell from beneath is moved for thee to meet thee at thy coming...the worm is spread under thee, and the worms cover thee." Isaiah 14:9-11.

"The same shall drink of the wine of the wrath of God, which is poured out without mixture into the cup of his indignation; and he shall be tormented with fire and brimstone in the presence of the holy angels, and in the presence of the Lamb; And the smoke of their torment ascendeth forever and ever; and they have no rest day or night." Revelation 14:10,11.

Spark,
Be carefull of marqueer. He is an admitted sodomite.
Sodomites are wicked and sinners before the Lord exceedingly (Gen.
13:13), are violent and doom nations (Gen. 19:1-25; Jgs. 19), are
abominable to God (Lev. 18:22), are worthy of death for their vile,
depraved, unnatural sex practices (Lev. 20:13; Rom. 1:32), are called
dogs because they are filthy, impudent and libidinous (Deut. 23:17,18;
Mat. 7:6; Phil. 3:2), produce by their very presence in society a kind
of mass intoxication from their wine made from grapes of gall from the
vine of Sodom and the fields of Gomorrah which poisons society's mores
with the poison of dragons and the cruel venom of asps (Deut.
32:32,33), declare their sin and shame on their countenance (Isa. 3:9),
are shameless and unable to blush (Jer. 6:15), are workers of iniquity
and hated by God (Psa. 5:5), are liars and murderers (Jn. 8:44), are
filthy and lawless (2 Pet. 2:7,8), are natural brute beasts (2 Pet.
2:12), are dogs eating their own vomit and sows wallowing in their own
feces (2 Pet. 2:22), will proliferate at the end of the world bringing

final judgment on mankind (Lk. 17:28-30), have been finally given up by God to uncleanness dishonoring their own bodies among themselves, to vile affections, and to a reprobate mind such that they cannot think straight about anything (Rom. 1:23-28), have wholly given themselves over to fornication and gone after strange flesh (Jude 7), must be pulled as faggots from the fire (Jude 23), and have no hope of Heaven unless they repent (Rev. 22:15), which they can't do in their prideful state (Jer. 6:15). They need to hear this truth if they are to have any hope of penitence, faith in Jesus Christ and salvation (I Timothy 4:2-4).

That's what happens when you dumb things down. Having a license doesn't
mean anything and they leave. Technology certainly didn't keep them in
the service.

Dumbing things down more will just let retards on HF.

You're so out of touch with the concept of truth that you have no
concept of reality, little sociopath. There is not one ounce of
goodness inside of you. If you'd like to discuss it, be sure to attend
next Monday's ARES meeting. I'm so looking forward to seeing you there.

"D\uring"? What happened to your wife, Roger? What about your
children? How did it come to pass that on the day of your adoptive

He's/your not? I guess your ID card expired. You'll have the
opportunity to obtain a new one on Monday. I'm not hiding behind a
woman, a front door or anyone, Roger. In your heart of hearts, you're
fully aware of that. I don't know of a single soul who is intimidated
by you.

I don't think Bert will be attending so you'll have plenty of opportunity for discussion with me. I promise to give you my full attention. I'm looking forward to our chat.

Okay, boy genius:

You're supposed to be Mark's mental superior, huh? You are posting as
"KB9RQZ_child_molestor". He isn't. Do you believe yourself to be
KB9RQZ? Are you a child molester? Are you Mark Morgan?

Nope.

I gave REAL units, Mark, with dates of service, places, etc. I
even gave dates of promotion boards and the PUBLIC documents in which
trhe results of those boards were published in.

You've given nothing.

> or are you admiting you have not PROVEN your serivice

Sure I have. Over and over.

What's "st sill", Mork?

And you don't have to call ovrseas to verify MY service.

> > No proof of your "business".

Nope.

A business card. A state business license. Reference to PUBLIC
records that establish that you do indeed have a LEGALLY ORGANIZED
business.

I don't care who you do business with. It's thier loss if they
are contracting with you for so much as the time of day.

> > No proof of your "marriage".

Blatant truth.

All you provided was a phone number that was call-forwarded to
God-knows-who.

That's not "confirmation"...That's deceit.

To a wrong numbr? Hardly.

No, Morkie...There's NO PROOF.

No degrees...No graduation...NO EDUCATION.

There's nothing to "publically accept", Moron. You've given

I'd never attack anyone for telling the "turth" Morkie.

So far, other than your name, the fact that you lie chronically,
and your callsign, you've not told us a single factual thing.

Nope.

You continue to mix your stories up, Mork.

I've never published the address of anyone but YOU, and THAT was
on the FCC database at the time.

Now you've tried to cover your tracks that your database "address"
looks like it was written by a drunken fool...

Which it was....

You're not "refusing" to do anything, Mork.

You're UNABLE to provide the photograph since no female companion
exists.

Heck, you're even too stupid to have gone and gotten some local
call girl to stand in and do it.

No therapy needed and no libel since no lies exist, Morkie.

Orca meets Jaws...Now there's a picture I didn't need!

You are fat. Enough that your weight meets the criteria of
"morbidly obese" by clinical definition.

I don't have a horse in any of those races, Mork.

You have all three of the e-mail addresses I use. You can send
your photos directly to me. After I verify the headers as not forged
by some wanna-be, I'll give the appropriate apology, if warranted.

But then you and I both know that that apology will NEVER be
needed, don't we..?!?!

> > The fact that you haven't done so simply PROVES that I am right.

No, it proves that I am right.

If you had just one cent's worth of common sense, you'd render up
the evidence necessary to stop the onslaught of messages you get
showing you to be the liar I know you to be.

YOU are MY proof that I am right, Mork.

An you just keep stoking more and more wood on that pile.

Thanks.

Not once.

You HAVE been repeatedly asked to provide the DIPLOMAS to these
alleged degrees, but have never been able to produce them. You get a
diploma regardless of whether you passed by a thread or top of your
class.

Either way, you've never been to college except as janitorial
staff or on a tour bus.

You've NOT provbided the information asked for, Mork.

Name of the institution.

Date of graduation.

Discipline of the degree (ie: Bachelor of Arts, Associate in
Business, etc...)

I have demanded DIPLOMAS, Mark, but those are given to every
successful graduate, whether they got a D average or Cum Laude.

You're not a successful college graduate.

You don't have one, let alone three.

Nothing else.

Everyone else in this forum knows that to be true, Mork, so why

Oh, you can bet your bottom dollar that if you made an EME contact
the other guy, Italian or 10 miles away, is going to QSL.

The QUESTION is will Mork Moron scan it and post it to
substantiate a claim.

So far, in regards to EVERY SINGLE CLAIM he's EVER made, the

Hans Brakob offered Morkie accurate and legally specific answers
to his (Morkie's) questions and got called all sorts of names for his
effort, Dave.

I wonder how he'll respoind to THIS...?!?!

Who's "Maj" Robeson, and yes, Morkie...there's "evidence" in just
about every post that responds to one of yours.

Who's "Maj"...?!?!...And yes, Morkie...Using the English language
CORRECTLY makes them intellectually superior to you.

YOU would be blinded because you'd bee too stupid to be using the
proper eye protection, Mork. That's why you're known as Mork.

There's no assertion of mine to prove, Mork.

And each of the addys I use specifically and accurately identify
ME...Not some false entity.

"Upperpenarmyguy" does NOT say "Mark Morgan" or "KB9RQZ".

It suggests that you belong to some rump militia.

You've never retracted your behaviour for that, Mork.

You continue to lie about it.

You continue to lie about being a Veteran.

No, YOU are the one throwing stuff on fires, Mork.

I only put in a handful of posts over three weeks, yet there YOU
are with 40-50 a DAY if not MORE!

Ohhhhhhhhhhh! Morkie caught one of my 1/10,000 typos.

Of course Morkie is still running about 1 in 10!

More incomprehendable gibberish, Mork.

Slow down...Use English...Use a spell checker!

And get rid of that "superhero" complex of yours! You are NOT
"persuing" justice for anyone...You're mending your own bruised ego,
nothing else!

Yep...Typos running right at 1 in 10.

No...You're falling prey to a "god complex" that's complicated by
your "superhero" psyche.

Neither unforgiving nor a bully, Mork.

I just don't let yo get away with your deceit and dishonesty.

Sorry.

"delsuional".....

Yes, Morkie...You ARE "DELUSIONAL".

Who's "Maj"...?!?!

You are not "preform(ing)" any "duty" here, Mork.

> Those efforts are of course limited by my status as a Mortal

They are also limited by your functioanl illiteracy and poor
moral fiber, Mork.

You can't brag about teaching lying to children then claim you're
"persuing justice".

Nope.

Absolute fact.

According to the American Medical Association it is.

The same organization you try to hide your perversions behind,
Morkie.

"Tactical deceit" in the execution of warfare under orders of the
Commander-in-Chief is one thing, Morkie...Your brand of boldfaced lying
is another.

Nope. I cheer on the guy who made some very sound, very accurate
assessments of your stupidity and cowardice.

You sure do whine.

Perhaps you should attend to your ex-streetwalker wife at 11:55 PM
instead of being on the net, fatass. Or do you just use her to hide

Say did your skull hurt when your mother had that partial birth
abortion in which you survived and the contents of your skull was
sucked out by the abortion doctor?

And it's funny how you went to somebody's house to take a picture of it
to plaster it all over the net, hypocrite. And you posted Wiseman's tax
info and filthy lies about his mother on the net. Maybe you can post
under "Stagger Lee" again so you can clear your conscience, what little

You're a piece of shit. You need to be flushed down the sewer. Maybe

I am a Canadian with serious chronic health problems and I have much more experience with the health system than I would like to have, I have come close being a silent key several times, I am sure that there are some who feel that is too bad that I was allowed to breed before my medical problems became obvious. In the minds of some I suppose that I have peed in the genetic pool.

I have never heard of a Canadian hospital shutting down because the money did not last until fiscal year end. While there are some weaknesses in our system such as delays in elective procedures but when the sand was running out of the hour glass there was always a system to help me out. Here everyone can get insured, there is an option to opt out of medicare but who would?

Think of the overhead that American doctors face having to deal with multiple insurance companies, each with different forms and procedures. Think of the people who can't get medical insurance no matter what the cost. Think of those who don't have because they can't afford it. And then there are those who exercise their right not have it.

In a situation where people get treated but can't afford to pay, the rates for everyone else must go up to compensate.

Canada is not perfect but it is a pretty nice place to live and we try to contribute as best we can.

By the way, if I were an American I would vote republican but I am not a single issue voter so don't construe that to mean that I from the far right wing. Consider me a fiscal conservative with a social conscience.

yes I am refusing

>

Steve if you acusation about her was true I could still take a pictuure
of her inher dress with the sign etc

indeed one of the reason I have refused is the certain knowledge that
you will claim she is jus good at crossdressing and demand more

which sooner or later gets to nude photos or god knows what else with
you history of stalikng

I am quite ableto provide a photo

I refuse

>
> Heck, you're even too stupid to have gone and gotten some local

That occoured to me as well as well as the belief you might well accuse
whomever (including my wife) of being just a call girl stand in

I have played your games in the past I gae yuou what you wanted in
exchange you promised to apologize

you welched on your words almost before the posting cylce you were on
was finished

this Post I am repling to all but proves my contention that NOTHING
will ever satify you as to the truth

you will contiue your harrassment as long as we Have any contact

and likely beyond

LOTS of therapy needed and you are telspinging conspricaies like mad

You sugesst My Fatherinlaw is going to give up receiveing ALL inbound
phone call just to deceive you?

wif My father in law were that willing to cooperate then when you
called why would he not just tell what I want

at least that charge would be plasable to make

so Now you Libel a NAVY)(Ed Hojnacki)as well as me just to defruad
you of what?

information you have no real right to

you need therapy for your PARANOIA

the accusation IS LIBEL against me and MY Father in law

you just keep compounding the lies and libel

and PROVING that nothing could satify yo and stopp your harrassment

>

can you read?

no it seem not I said "IF you can get close enough for the photot you
would know she is female"

we know you can't get close enough

>

delsuional behavoir Robseon

now you are claiming you weigh a person you have never even seen

get some therapy

at best you are repeatign OLD news I was at onepoint quite heavy losing
150 lbs changes that

ndeed at this point I know (since theymade me take a physcial) I am
within army standards for service
>
> > but the facts are you lack access to us

sure you lack access to us

why do you keep up this balatant lie

you can';t take a photo of either of us that is a fact

even if you came here youd have to stlak us a while to catch a shot off
our land and on it you can't see us short of comittting trespass and

likely giving me a legal excuse to kill you and put you outt of my
affairs permenantly

yes I confess I would enjoy that

and repeat if you want to commit suicide by such a means I will assist
you gladly

sure you do you have already shown your hand

you asked how can you harrass me if I do what you ask I don't how you
can do it I don't know how you can enage in such behavoir as we all
have seen from you

>
> You have all three of the e-mail addresses I use. You can send

am I supposed to believe you?

that you will not share them if I provided them

that will not claim they are a fake

even here you add another demand that the email header be verifable
presumeable you mean the unstated "to your satifaction) or something
like that

I gave you the apolgy you demanded and you refuse to adknowledge that
>
> But then you and I both know that that apology will NEVER be
> needed, don't we..?!?!

I know you will never give it.

you would keep dangling new condictions

Indeed based on your pattern I suspect I provide access to her for GYN
type exam and you would stil claim fraud or even if I went so far as to
get her to sign arealease for GYN MD medcial recods you would just

claim that is a fake

you have decided for some demented reason that contary to all logic a
Bisexaul can be involved with a female

it happens all the time Robeson

that you go on like this shows you either have SERIOUS SEXUAL issues or
SERIOUS issues as a stalker

either way get some therapy

In this case it impossible to prove you right

it simply is

you tone and manner make it clear NOTHING would satify you

so why bother?

>

nothing will stop the onslaught

you have made claer you will call everything a fake

no matter what
>
> YOU are MY proof that I am right, Mork.

Nothing can prove my wife is male, and clearly nothing on this planet
indeed I fully beleive if you did sue me and show up in the courtroom
with us you insist she was male

You need some therapy

>
> An you just keep stoking more and more wood on that pile.

no I simply refuse to dance

you admision that you harrasing for no good reason is noted

the whole thing is just your sick way of trying to conrol other people

get some therapy

What indication is there that you struck a nerve, nutball? I addressed your statement about you/Wiseman adhering to any religious faith. You responded with some wild speculation about priests, molestation and the dead. If that's part of some faith to which you subscribe, it must be waaaaay out there.

What's the significance of the celtic cross? Is it just some leftover belonging to your adoptive mother?

Despite your surname, you aren't very wise. The name UnWiseman is so
very much you.

No, I didn't plaster anything all over the net. I placed it on my web
page and provided a link to it. All that, of course, took place after
you did what I said you did. I even told you that I'd do it. The
prediction of the old saying came true for you. What went around DID
come around. You got what you gave.

> And you posted Wiseman's tax
> info

Yes, I most certainly did, right after you posted mine. You even tried
stating that the information was a lie. Then you had to eat your words
when I provided the link to the Marshall County Assessor's Office.
Again, what went around DID come around.

I've done no such thing--ever.

I've posted as no one but myself--ever, anywhere. You make the mistake
of judging others by your own, twisted actions.

I'm sure that in "Roger World", that's the scene as you see it. The
reality is that you don't seem to like getting what you dish out.
That's what you've gotten from me and it is certainly what you'll
continue to get from me. You run your yap here, but you and I know that
you'd never get away with it in a face-to-face encounter. You're a
cowardly humbug.

Maybe it would if there was actually a coal mine under it. The fact is,
if the coal mine comes this way and I sell my place, I'm apt to make
something like five to six times what my property is worth. You should
pray for a coal mine, Rogie, to whatever deity it is that filth mongers
worship. Otherwise, you're stuck in the little box between two hills.

I did no such thing. I wasn't even in the country when it was recorded.
I just know the guy who made it. I guess you figured that no locals

"Behin d"? I sat right next to you at the only ARES meeting you ever attended, Bozo. How would you know whether I was behind, beside or in front of my wife if I "supposedly" went to your door?

So far, you've varied the door scenario so that:

1) It was a lie

2) You looked through your peephole and saw the two of us and decided that it was "2 on 1".

3) You weren't even home and that your imaginary girlfriend didn't want to anwer the door

You're a cowardly humbug.

See you at next Monday's ARES meeting, Rogie. I promise not to hide behind anyone and to pay you the attention that you richly deserve.

I see that, while you accuse others of not being able to read headers,
you yourself are living in a glass house. If you looked carefully at
the headers for any of my posts, you'd see that they do not come from
Earthlink. At one time you were able to do that, but alas, your mind

Classic projection. But, if anything, you are a fly. Wherever there
are feces, you are to be found wallowing in them and celebrating their
presence as food for the maggots you will leave.

You are Usenet's Lord of the Files.

Morkie & Davey Hell are sodomites!!
SODOMY IS AN ABOMINABLE SIN, WORTHY OF DEATH.
"If a man also lie with mankind, as he lieth with a woman, both of them have committed an abomination: they shall surely be put to death; their blood shall be upon them." Leviticus 20:13. "Who knowing the judgment of God, that they which commit such things are worthy of death, not only do the same, but have pleasure in them that do them." Romans 1:32.

See also Leviticus 18:22, Genesis 19, Romans 1:18-32, I Corinthians 6:9-11, I Timothy 1:10, and Jude 7.
GOD HATES ALL WORKERS OF INIQUITY.
"The foolish shall not stand in thy sight, thou hatest all workers of iniquity." Psalm 5:5.
See also Leviticus 20:23, Leviticus 26:30, Deuteronomy 32:19, Psalm 5:6, Psalm 11:5, Malachi 1:3, Matthew 7:23, and Romans 9:13.
JESUS CHRIST DIED ONLY FOR THOSE WHO BELIEVE.
"For God so loved the world that He gave His only begotten Son, that

whosoever believeth in Him should not perish, but have everlasting life." John 3:16.
See also John 13:1, John 17:9, Ephesians 5:25, etc.
ONLY GOD'S ELECT HAVE THE CAPABILITY TO BELIEVE.
"Therefore they could not believe, because that Esaias said again, He hath blinded their eyes, and hardened their heart; that they should not see with their eyes, nor understand with their heart, and be converted, and I should heal them." John 12:39,40.
See also John 10:11,26, Matthew 11:25,26, Acts 13:48, Romans 9:19-24, etc.
SODOMITES ARE PROUD OF THEIR SIN ("GAY PRIDE"), AND IN THAT PRIDEFUL STATE THEY CANNOT REPENT - YOU CANNOT REPENT OF SOMETHING YOU'RE PROUD OF.
"Were they ashamed when they had committed abomination? nay, they were not at all ashamed, neither could they blush: therefore they shall fall among them that fall: at the time that I visit them they shall be cast down, saith the LORD." Jeremiah 6:15.
See also Jeremiah 13:23, Romans 1:24-32, Ezekiel 16:49-50, etc.
THE SODOMITES' ONLY HOPE IS TO HAVE THE UNAMBIGUOUS TRUTH PREACHED TO THEM, AND PERHAPS GOD WILL SOFTEN THEIR HEARTS AND GRANT THEM REPENTANCE TO DEPART FROM THEIR SIN AND NAME THE NAME OF CHRIST. NOT VERY LIKELY, THOUGH, SINCE GOD HAS GIVEN THEM UP.
"Nevertheless the foundation of God standeth sure, having this seal, The Lord knoweth them that are his. And, Let every one that nameth the name of Christ depart from iniquity." II Timothy 2:19. "Wherefore God also gave them up to uncleanness...unto vile affections...to a reprobate mind." Romans 1:24-28.
See also II Timothy 2:24-26, Psalm 5:5, I Corinthians 6:9-11, Acts 17:30, Jude 22,23, etc.
THERE IS A HELL WHERE ALL IMPENITENT SINNERS WILL RESIDE FOR ALL ETERNITY. THAT INCLUDES SODOMITES (CALLED "DOGS").
"And they shall go forth, and look upon the carcasses of the men that have transgressed against me: for their worm shall not die, neither shall their fire be quenched; and they shall be an abhorring unto all flesh." Isaiah 66:24. "For without are dogs..." Revelation 22:15.
See also Mark 9:44, Luke 16:23, Revelation 20:15.
In summary, sodomites are wicked and sinners before the Lord exceedingly (Gen. 13:13), are violent and doom nations (Gen. 19:1-25; Jgs. 19), are abominable to God (Lev. 18:22), are worthy of death for their vile, depraved, unnatural sex practices (Lev. 20:13; Rom. 1:32), are called dogs because they are filthy, impudent and libidinous (Deut. 23:17,18; Mat. 7:6; Phil. 3:2), produce by their very presence in society a kind of mass intoxication from their wine made from grapes of gall from the vine of Sodom and the fields of Gomorrah which poisons society's mores with the poison of dragons and the cruel venom of asps (Deut. 32:32,33), declare their sin and shame on their countenance (Isa. 3:9), are shameless and unable to blush (Jer. 6:15), are workers of iniquity and hated by God (Psa. 5:5), are liars and murderers (Jn. 8:44), are filthy and lawless (2 Pet. 2:7,8), are natural brute beasts (2 Pet. 2:12), are dogs eating their own vomit and sows wallowing in

their own feces (2 Pet. 2:22), will proliferate at the end of the world bringing final judgment on mankind (Lk. 17:28-30), have been finally given up by God to uncleanness dishonoring their own bodies among themselves, to vile affections, and to a reprobate mind such that they cannot think straight about anything (Rom. 1:23-28), have wholly given themselves over to fornication and gone after strange flesh (Jude 7), must be pulled as faggots from the fire (Jude 23), and have no hope of Heaven unless they repent (Rev. 22:15), which they can't do in their prideful state (Jer. 6:15). They need to hear this truth if they are to have any hope of penitence, faith in Jesus Christ and salvation (I Timothy 4:2-4).

I didn't marry anybody in Mexico.

I've not been to mexico in almost thirty-five years. This "boyz town"
place--it sounds as if you have some familiarity with it. Tell us, what
kind of place might that be?

No, it's what happens when give people tests that are irrelevant to the state of the service and the world today. It's what happens when old timers keep the impression alive that ham radio is about code, tubes and other worthless old "technologies". It's what happens when we try to gate people out by making them pass the same worthless crap we had to pass because, "well I had to do it so they should have to do it" mentality.

We already have a bunch of "retards" on HF and have for the thirty plus years that I can remember. Testing didn't keep the low-lifes out then, and it is not going to do it now.

Learn to face reality. The old tests are what has brought on the problems - especially the worthless code tests.

It's not about "dumbing down" the testing. It's about the need to modernize the testing, and our hanging onto the old and outdated for far too long, that has caused the problems we face today.

Interestingly, my wife is also a Canadian, she moved down here to the US just before we got married. She worked only part time in Canada. Aparantly, the health care is NOT universal, as many meds she needed she had to pay for out of her own pocket, and had to wait months for an MRI (She just had one here on one weeks notice). Yup, there are issues here too, but the Canadian system is far from perfect either.

Genesis 14
Abram Rescues Lot

1 At this time Amraphel king of Shinar, [a] Arioch king of Ellasar,
Kedorlaomer king of Elam and Tidal king of Goiim 2 went to war against
Bera king of Sodom, Birsha king of Gomorrah, Shinab king of Admah,
Shemeber king of Zeboiim, and the king of Bela (that is, Zoar). 3 All
these latter kings joined forces in the Valley of Siddim (the Salt Sea
[b]). 4 For twelve years they had been subject to Kedorlaomer, but in
the thirteenth year they rebelled.

5 In the fourteenth year, Kedorlaomer and the kings allied with him
went out and defeated the Rephaites in Ashteroth Karnaim, the Zuzites
in Ham, the Emites in Shaveh Kiriathaim 6 and the Horites in the hill
country of Seir, as far as El Paran near the desert. 7 Then they turned
back and went to En Mishpat (that is, Kadesh), and they conquered the
whole territory of the Amalekites, as well as the Amorites who were
living in Hazazon Tamar.

8 Then the king of Sodom, the king of Gomorrah, the king of Admah,
the king of Zeboiim and the king of Bela (that is, Zoar) marched out
and drew up their battle lines in the Valley of Siddim 9 against
Kedorlaomer king of Elam, Tidal king of Goiim, Amraphel king of Shinar
and Arioch king of Ellasar-four kings against five. 10 Now the Valley
of Siddim was full of tar pits, and when the kings of Sodom and
Gomorrah fled, some of the men fell into them and the rest fled to the
hills. 11 The four kings seized all the goods of Sodom and Gomorrah and
all their food; then they went away. 12 They also carried off Abram's
nephew Lot and his possessions, since he was living in Sodom.

13 One who had escaped came and reported this to Abram the Hebrew.
Now Abram was living near the great trees of Mamre the Amorite, a
brother [c] of Eshcol and Aner, all of whom were allied with Abram. 14
When Abram heard that his relative had been taken captive, he called

out the 318 trained men born in his household and went in pursuit as
far as Dan. 15 During the night Abram divided his men to attack them
and he routed them, pursuing them as far as Hobah, north of Damascus.
16 He recovered all the goods and brought back his relative Lot and his
possessions, together with the women and the other people.

17 After Abram returned from defeating Kedorlaomer and the kings
allied with him, the king of Sodom came out to meet him in the Valley
of Shaveh (that is, the King's Valley).

18 Then Melchizedek king of Salem [d] brought out bread and wine.
He was priest of God Most High, 19 and he blessed Abram, saying,
"Blessed be Abram by God Most High,
Creator [e] of heaven and earth.

20 And blessed be [f] God Most High,
who delivered your enemies into your hand."
Then Abram gave him a tenth of everything.

21 The king of Sodom said to Abram, "Give me the people and keep
the goods for yourself."

22 But Abram said to the king of Sodom, "I have raised my hand to
the LORD, God Most High, Creator of heaven and earth, and have taken an
oath 23 that I will accept nothing belonging to you, not even a thread
or the thong of a sandal, so that you will never be able to say, 'I
made Abram rich.' 24 I will accept nothing but what my men have eaten
and the share that belongs to the men who went with me-to Aner,
Eshcol and Mamre. Let them have their share."

There are delays I will admit that. Universal means that everyone can
participate it, it does not mean that it covers everything. I also have
private insurance to cover drugs, dentistry, the surcharge for private
hosptital rooms etc. I guess that I got really ticked off when the guy
said that hospitals routinely close because they run out of money, that
was bull and it really ticked me off. Please excuse my sensitivity.

nope nobody failed that day and I took and passed the general test for
a CSSE and no one else even took such an exam that day

the written test are fairly you insist they are yourself (wether they
are too easy is point we disagree but not that they are easy)

you are simply stupid enough to think you can jusdge a persons
intelegence for their first drafts esp when someone has dyslexia and
aphasia

no need for much to pass with a degree is Physics and MS Geophysics
(and I specailize in Sesmic wave propagation BTW which is not al
toghter unlike RF prop in its math)

Well, you've got me. All my dreadful secrets are out. Better add that
I worked part-time at Sears in high school and that my car is yellow.

Did it take you long to master the use of QRZ.com?

OK, fair enough.

The Amateur Radio Service of the 21st century will be all CW without a
Morse Code Exam.

We'll go out of existance EXACTLY like we came in.

I'm sure that will make the Morseodists happy.

No, not all all. It should be obvious that if you can make a

You should self-modify your license and cease amateur operation until
you remember.

The amateur is self-policing, and you no longer meet your own standard.

I used radios in the military. I never used a CW key in the military.
I never jammed another operator, although Brandywine asked me to reduce
power once.

We self-train. It is a continuous process of improvements. You
mistakenly believe that at the conclusion of The Exam, the "operator"
is 100%.

Never was, Never will be, and neither were you weren't.

I'm beginning to think that you're from the school of "The Older I Get,
The Better I Was!"

Nor do you.

I've listened to emergency responders on a scanner before. They don't use Morse Code, they don't use CW. They use FM/Voice. Somehow they are effective at it, not having taken a Morse Code test. How can this be?

Tell you what. The next time your YL dials 911 for you, she has to communicate with the 911 Operator in Morse Code. She can just sound it out with her mouth, no keyer, sounder, clacker or anything else required.

When the Operator tells her to speak normally, your YL is allowed to say once, and only once, using her normal voice, "Real communications takes place with Morse Code" and then revert back to sounding out her message with Morse Code dits and dahs.

Agreed?

On your block of granite, she will say, "Here Lays Al Klein, Who had no use for Voice Modes. May He Rest In Peace"

Dial 911 and tell the operator that you don't need instant gratification, take your time.

You seem to be confused. DXCC is an award offered by the ARRL, not the FCC. It has nothing to do with licensing.

You ask "What next?" How about a test for everyone else except you, where you get to try to recall what was on your test, but can't.

you have a reservation in hell,faggot.

http://www.thesignsofthetimes.net/

http://www.godhatesfags.com/fags/fag.html

The word "fag" is a contraction of the word "faggot" (or, "fagot").
When traced through its etymological history, the word "faggot" simply
means "a bundle of sticks used as fuel." See dictionary.com and
thesaurus.com (where such words as "fuel" and "brimstone" are used as
synonyms). "Scholars" can't decide when such a word began to be used in
reference to homosexuals, so we'll give the answer here: "I have
overthrown some of you, as God overthrew Sodom and Gomorrah, and ye
were as a firebrand plucked out of the burning: yet have ye not
returned unto me, saith the Lord." Amos 4:11. The word translated
"firebrand" is the Hebrew word "uwd," which comes from a Hebrew verb
meaning "to rake together" (or, "to gather together"). In short, the
Hebrew word "uwd" is talking about burning sticks of wood that are
gathered together. That is what the English word "faggot" means. Amos
4:11 could just as easily be translated "...ye were as a faggot plucked
out of the burning..."

For those geniuses out there who are asking, "are you saying that God
hates burning pieces of wood?", the answer is "no, we're using it as a
figure of speech, just like the Bible uses it." It is an excellent
metaphor to describe sodomites because they fuel God's wrath, they burn
in lust, and they will burn in hell. In Amos 4:11, the "fag" is the
person who is sinning after the manner of Sodom and Gomorrah, has seen
other "fags" overthrown by God, and still refuses to repent. So, the
word "fag" refers to people who sin like the Sodomites did. It not only

refers to homosexuals, but also refers to people who support homosexuals (see Romans 1:32), and people who engage in all other relatively "lesser" perversions (like impenitent premarital sex and adultery, including the adultery of all of you divorced-and-remarried "born again Christians"). On this web site, we use the word "fag" in accordance with Amos 4:11.

For those of you who have deluded yourselves into thinking that the story of Sodom isn't really talking about homosexuals, read the following: the people of Sodom and Gomorrah had completely turned away from God, and whenever that happens, homosexuality abounds. Paul described this in Romans 1, and you can read the story of Sodom and Gomorrah in Genesis 19. Conditions in Sodom were so bad that it had become acceptable for men to surround Lot's house and ask to have sex with the men inside. Anybody who thinks that today is any different than those days needs to attend San Francisco's annual gay rights parade, stand along the parade route, and hold a sign that says "GOD HATES FAGS." You'll see and hear evidence of all of the sins of Sodom in just a few short hours (sodomy, violence, fornication, adultery, pride, sinful treatment of the servants of God, etc.) The same mob mentality that ruled the unlawful fags in the days of Sodom rules the unlawful fags today.

You keep screwing it up. I'll run through it again for you:

Mark and Todd - color unknown
Me - not yellow, no streaks
My wife - not yellow, no streaks
My car - yellow
My high school employment - Sears
Roger Wiseman - sociopath

What color streak will you have after not showing at the Marshall County

Considering that over 90% of the Babble was made up centuries after the fact out of a bunch of twice-told tales, by a bunch of Jewish priests during the Babylonian period (in the OT), and a bunch of delusional Xian fanatics (in the NT, though that was largely just a century or two afterwards), may I just say in reply, "Bahhhh-RING IT!"?

Of course we already have your "allegation" that you served under
a diffrent name than "Morgan", so I don't see what good it will do to
write them, but I'll try.

No...YOU are the one demanding I call it...YOU are the one who has
since set up the sockpuppet.

Sorry, Morkie. Too transparent.

That control is not at issue, Mork.

What's at issue is that the information obtained would be factual
and unbiased.

There's no "FURTHER" invcasion of anything, Mork, since there was
no INITIAL invasion, except what information that's been gleanable from
YOU in this forum or other PUBLIC records which are available to
ANYONE.

So far, not one word of ANYthing that I have said has been
disproven.

NOT ONE.

Why doi YOU engage in misuse of the English language?

And why do you try to dodge YOUR lying by making FALSE accusations
of lying of others, Mork?

YOU went on to brag about that name and the city they lived in,
Mork.

I did nothing of the sort.

It is in English, Mork...Spelled correctly, punctuated correctly,
and in proper grammatical format.

Still worse than 10-to-1, fatboy.

Oh, TRUST ME, Mork, I do NOT care for pictures of crossdressers.

But since YOU brought it up, fatboy, I am sure that YOU have
something to HIDE, and I bet that crossdressing has something to do
with it.

> which sooner or later gets to nude photos or god knows what else with

Nope. I don't want nude photos of anyone, let alone your shemale
spouse, and I have no history of stalking.

> I am quite ableto provide a photo

I am sure you can provide "a" photo.

Just not a photo of a female willing to appear next to YOU holding
a sign that says she's your spouse..

Can't say I blame anyone.

> I refuse

You can't "refuse" to provide what you CAN'T provide, Morkie.

It occured to you since you aren't martried to a real woman, and
any health care professional worth thier salt would see the difference.

And I ahve no doubt you know where ALL the call girls in your neck
of the woods are...

> I have played your games in the past I gae yuou what you wanted in

I've never welched on anything, Morkie.

The ONLY thing that will satisfy me is the truth.

And as soon as we get some from you, the better.

The "harrassment", as you call it, is nothing more than not
letting you get away with lying in public over and over and over and
over and......

So stop lyiing and the "harrassment" will stop.

No. I accept that you know the person at the other end of the
line.

The information gleaned is corrupted.

More and more misspelled words that "say" nothing, Morkie.

> You sugesst My Fatherinlaw is going to give up receiveing ALL inbound

Nope. I say that the person on the other end will NOT answer
phone calls from certain area codes as they appear on his Caller ID.
They then go on to the forwarded number.

It's called "screening your calls" and became very popular with
the advent of Caller ID, Morkie.

> wif My father in law were that willing to cooperate then when you

Charge? Plasable?

What are you talking about, fatboy?

I libel no one, Morkie.

Then YOU shouldn't have made an issue of mentioning marraige and
gender in this forum, Morkie. YOU should have never discussed your
perversions and and your personal "policy" on lying.

That's why you are getting b*-slapped in public over and over!

> you need therapy for your PARANOIA

What paranoia? I am simply NOT willing to be duped by you,
fatboy.

> the accusation IS LIBEL against me and MY Father in law

The "accusation" is to say I refuse to be sucked in to your
deceit, fatboy.

> you just keep compounding the lies and libel

No lies. No libel. Nothing to satisfy and no harrassment.

Just lots and lots of Morkie Mularkie

Sure I can.

But I have trouble reading most of YOUR crap since you refuse to
use a spellchecker.

> we know you can't get close enough

Sure I could. If I chose to. Your address is public domain
inofrmation.

It's not illegal for me to sit across the road and take pictures,
Mork. It's not illegal for ANYone to take pictures, except in areas
designated "No Photography" in security areas or when taken while
commiting an act of trespass to do.

And unless you intend to keep your "mate" indoors 24/7 or dress
"her" in a burka, there are plenty of public opportunites to take a
picture.

Ask your lawyer.

Nope. And your typos are 2-in-three...Whew!

First of all I HAVE seen you, Morkie. You're morbidly obese.

Secondly I don't have to put you on scales to see that you're
Morbidly obese.

> get some therapy

Get Jenny Craig, fatboy.

And you're STILL morbidly obese.

Army entrance standards still allow an obese person to get in the
door, Morkie, as you well know.

> > > but the facts are you lack access to us

Nope.

Because there's a road right in front of your house.

Because you don't stay in there 24/7.

Because at this time of yera there is more sunlight than night
time.

> you can';t take a photo of either of us that is a fact

Sure I can. I'm rather competent with a camera, Mork.

There you go threatening deadly force again all-the-while accusing
others of it, Mork.

And none of what you said about photo ops is true.

Too bad you don't possess the SKILLS to do it, Morkie.

I've never ONCE participated in any of that "bogus pictures" game
that the other folks have...Including Lennie the Liar.

> you asked how can you harrass me if I do what you ask I don't how you

There's no harrassment here, Morkie.

Of couse you are supposed to believe me, Mork...YOU are the one
who purports to support lying. I don't.

If you sent me a private e-mail and then I published it, it would
be "proof" that I lied...And I won't give you that kind oif ammunition,
fatboy.

> I gave you the apolgy you demanded and you refuse to adknowledge that

Nope.

I acknowledged it and expressed appreciation for it.

But then you dishonored your apology by going right back ahead and
insisting that your lying about it was "federally approved" and that
you'd do it again.

> > But then you and I both know that that apology will NEVER be

Not for what I've said about your false marriage, business
ownership, education and college degrees.

What's a "condiction" and how does it dangle, Mork?

What's a "bisexaul", Mork? And what do "bisexauls" do with women?

No...

I have serious issues with your numerous lies and the way you dig
yourself in deeper, fatboy.

I could care less about your "sexaul" conduct, but YOU keep making
an issue out of it.

You've been told how to stop it but you keep diving right back in.

Not true.

You've done it over and over by not providing a photo of you with
a woman holding a sign claiming to be your spouse and a current paper
with which to validate the date.

> it simply is

I know it's the truth that I am right, Mork.

> you tone and manner make it clear NOTHING would satify you

The only "tone" I have is to laugh at your assinine dodges and
attempts to deceive me and others, Mork.

> so why bother?

Why indeed, but you do it anyway.

A photo would end it all now.

A scan of your alleged college degrees would stop it.

A scan of a marriage license would end it...(I have access to a
Hebrew interpreter)

> > If you had just one cent's worth of common sense, you'd render up

As long as you keep throwing more gas on the fire, you're right.

I've made nothing of the sort "claer", Mork.

You just use that as an excuse to not pony up some proof of your
assertions.

I am sure that much blubber on the dance floor could cause severe
structural damage, so I guess we have something to thank you for!

I've made no such admission, Morkie.

I HAVE stated that as long as you keep providing more "fuel" (your
lies and deceit) I will continue to show them for what they are...

There's nothing in this forum that YOU didn't provide, Morkie.
There's no "admission" here except for excerpts from your fantasies.

What's a CSSE, Mork?

I KNOW!

We can judge YOUR posts since you claim expertise in English and
Computer Science but obviously can't employ simple spell checking
software or proof read your work before you hit the "send" button.

What you have is a double dose of big mouth compounded by a dose
of maniacal ego.

Where's those three college degrees at, Morkie?

You're sure not using them here!

Nope...Get it right, Morkie.

I said WHAT WOULD YOUR "IN-LAWS" think of you.

It was a question.

YOU accuse everyone else of "paranoia", yet you're steeped deep in
it!

Nope.

YOU provided your in-laws name and general geographical area,
Morkie, and have been trying to blame everyone else EXCEPT yourself for
the invasion of THIER privacy.

Well...Lessee...You're 40-something, so I assume your "wife" is in

That's a question posed to you on more than one occassion.

Usually right after making some assinine claim about ARES,
emergency communicaitons, organizations you've not been a member of for
yeas, etc etc etc.

There should be.

But that would require scrapping our present licensing system,
establishing a trustworthy netowrk of mentors and examiners, then
keeping it in place for at least one generation of hams so that it
becomes "the standard".

But since that won't ever happen, why worry?

Nope.

Let's get it bck to the point where an Amateur Radio license
carried some respect with it. An Amateur license used to bring with it
enough respect that some communitiy colleges actually granted elective
credit for it. Saddleback Community College and Orange Coast Community
College's in Orange County, California, for example.

But that was yesterday, and yesterday's gone.

Like how unlicensed devices play a major role in emergency comms?

Did you see the stories in the general media of how people were
calling for help on CB's and FRS radios without results?

Sure you did.

At least >>I<< did. So did my best friend who got his Novice at
the same time I did. And so did the 4 guys and 2 gals in the preceeding
year.

That's not what he said, Brain.

His "disdain" is for a licensing system that is ineffective.

There was not one word of "disdain" for "fellow amateurs" in

"Self-train", to be sure.

and operation?

Yet another personal attack rather than addressing the worthiness
of the comment on it;s own merits again.

Just like you CLAIM that you don't, Brain...

So HOW do you account for this?

Shift gears. Make reference to persons operating on other radio
services not regulated by Part 97.

Let's see if that orange tastes like an apple.

And let's see if Brian P Burke can be any more assinine or
demeaning when such was not directed to him in the first place...

Just like Lennie...Why am I not surprised...?!?!?

Third time's a charm for making that attack PERSONAL rather than
rationallly addressing why Morse Code testing is not appropriate for
AMATEUR RADIO...Not Public Service, Business, Common Carrier,
etc....AMATEUR RADIO...

By the way, Brain...

I see where Al addressed TECHNICAL skill...Not MANUAL skill...

Yet YOU are going on and on about using Morse Code when talking to
a 9-1-1 operator.

Why is that?

real radio innards...

.....since YOU suggested it...

How do you dial 911? My phone won't allow more than 1 digit at a

So what?

Much of your foregoing comments were attacks on Al Klein, not the
merits of Al Klein's comments. Yet you didn't address his point except
to ty a rather lame redirect.

> You ask "What next?" How about a test for everyone else except you,

Or how about a test that explains how unlicensed devices play a
major role in emergency comms? Or maybe explain how ARES operators
can't / won't respond to or sustain a response in a major disaster or
emergency?

You keep making assinine assertions and attacks all-the-while
insisting that you don't make assinine assertions and attacks,
Brain...Yet here was a prime example of you doing exactly that.

Wiseman doesn't claim to be a christian, dumbass. Religion is for the

There's no test at all, so those claiming that the reason they want a
test for CW dropped because it's not "modern" have no argument - they
want no test for FSTV, SSTV, RTTY (which is also pretty old hat),
packet, PSK, etc. They want no test at all, unless they can memorize
a few answers to "pass" it.

Sure it is. "Beefing up" the written exam is a counter to "drop CW
because it's old fashioned". If you want modern you want the testing
to be turned from CW to modern modes. Those who want CW dropped just
want what they can't memorize dropped so they can get a ticket without
really being tested on anything. Actually knowing anything is so old
fashioned, isn't it?

>> We want to get back the level it used to be before it was

No, I'm not addressing *where* the test is held at all - I'm addressing *whether* there's any real test, which there isn't, except for CW right now. Spitting out something you memorized is only a test of memory.

>> Just by guessing at the

I don't remember after almost 50 years - but I could still draw them today, and it's not a test of remembering what's on the test, it's a test of knowing what's in a radio.

Why? Testing isn't about memory, it's about knowledge.

Sure I do. The test wasn't to remember what circuits to draw, it was to draw them. And I can draw them any time.

Oops, that's right - no more relevant testing, isn't that what people are asking for? Just give me the answers so I can memorize them and pick them out on the test.

But you had to learn how to use the radios. Hams today don't - they
memorize a few answers, buy equipment and get on the air - with no
understanding of what they're doing, and no desire to learn.

Very bad example of an attempt at sarcasm and a misunderstanding of

But an award for wanting has to do with "I want it so it's my right to
have it", which is what I'm talking about. No one has any "right" to
get on the air.

But that's just the "argument-du-jour", Al. As soon as formal
Morse Code testing is dropped, this will be the next attack. "I Don't

Boy, isn't THAT the truth.

A friend of my 14-year old was asking "Why go to school anymore?
If I need to find out about it, I'll just pull it up on the web..."

And if only she hadn't appeared so sincere when she said it...

I worry for the future.

I don't think I'd say "no deisre to learn", Al. Just no desire to
learn HOW it works...Not HOW to work it!

Brian didn't either.

He professes "emergency comms" experience but clearly doesn't
understand emergency communications or the Amateur Radio programs that
support them.

Again, I'd disagree that some of the shennanigans on 75 represents
an overall view of Amateur skill with radios, Al.

Afterall it was a lot of those same folks on 75 and 40 meter phone
nets that were the folks that were recently recognized on the floor of
Congress recently.

Some were.

Here ins SE Tennessee we have some really sloppy, uneducated EMS
folks when it comes to radios. Trying to educate them on how to use it
PROPERLY, what it can and can't do is problematic at times. They see
some of these EMS radios with a telephone-style handset on it and think
"telephone".

Improper radiotelephone technique has resulted in patients getting
the wrong orders at times or the wrong hospitals being notified of
impending trauma patients inbound, only for a third, unsuspecting
facility to suddenly have a 10-33 Ambulance pull up at the back door.

this sounds very strange...

I hate to say this, but even if the moon were in "new phase" (completely invisible), its still there, still has a reflective surface to bounce signals off off and is still in its calculated position relative to the observer on the ground. man, isn't celestial mechenics fun?

phase has nothing to do with whether anyone can bouce signals off it or not.

works fine from here. you may need to either change your nameserver settings
or check your network settings... either that or they were down when you
tried.

The common sense was needed in Michigan, Eric!

He still doesn't have an event horizon for the contacts he's

Probably, Cecil, since it would then make it difficult to pass the
test.

"I"

There. You just got ONE "character" of several
electronics-related formulas.

Now do something with it without knowing the rest of the
"characters" that go with it.

You missed the point. The Morse code skill exam requires
memorizing the characters. Memorizing is being condemned
as an evil act. Since memorizing is evil, the Morse code
skill exam should be the first thing to be eliminated.

In some cases, it "could" be said that hairs are being split. To have "knowledge" of the code - could mean basically - you know it exists and why it is used. To "know" the Morse Code, usually refers to KNOWING the characters sufficiently to use them at whatever speed it is you can. On the other hand, someone who isn't involved could say - that a Ham operator is "knowledgable" in the code. Heck, to someone not IN Ham radio - they could easily assume a NO CODE tech - KNOWS code.

Memory plays a big part be it with learning CODE OR Electronics formulas. MEMORY plays a huge part in "remembering" how to solder correctly and so on. You have to MEMORIZE these things just like code characters - to be proficient. Just like MEMORIZING traffic signs and so on - to get your license to drive.
I think there is too big a deal being made here.

It comes down to - if you want to do ANYTHING - be it do morse code, drive, parachuting, whatever - you have to MEMORIZE SOMETHING - to make it happen.

Just to clarify my point - many "assume" a Ham Operator - regardless the
license - KNOWS code. So, if a "No Code" tech simply says "I"M A HAM
OPERATOR" to someone not knowing the license class structure, the
"assumption is made. AND unless that NC tech clarifies it, the unsuspecting
person will go on in ignorance "assuming" ALL hams "know" code. Morse Code
(per my recollection) has always been and most likely - even if only in
history books - always will be known and associated with HAM RADIO.

I have it Steve

But he is right the phse of the Moon does not prevent contacts off it

Now the new moon does make things rougher by putting the moon path near
the noisey LoS to the Sun but even that does not prevent it

for a start the autor would list a problem for my type of station as
being tha I can only work close to the horizon of the earth ut one of
the advantages of living in the Copper country is at this time of year
the moon bearly rises out of the hthe window , this winter when the

Are you trying to confuse the issue by using logic?
The (no)morse issue is nothing other than a purely emotional thing.

FWIW - I took the test, I passed it (barely), I used it twice. AlMost all

single "antenna array".

Your universe is all upside down. You post filth about priests, parents children, wives, your local police, the lady who runs your previous ISP, your local ARES organization and anyone who objects to your mentally ill, sociopathic behavior and that's normal behavior for you. You and your imaginary friend are okay, but the rest of the world is hosed up.

> Now go bend over for your Finnish ex-streetwalker.

You readily confirm everything I've ever stated about your behavior.

You need to seek treatment, Roger.

If you'll see me at the ARES meeting on Monday, I'll gladly explain to you about your actions having possible consequences.

My mother told me stories of learning morse code this way when she worked for the railroad. She then taught me morse code this way. For twenty yeasrs after that I always wanted to be a ham and finally got m ylicense at about age 35. I was fairly active for about 8 years and pretty much lost interest when my daughter was born. In the last couple of years I have been sporatially interested again but their alaways seems to be little projects and interest that pull me away from it.

When I first went to work at tmy present job almost every tech that worked there was a ham. Just about all of them retired within a few years and nnd only a couple are still active on the ham bands. They pretty much all say that they just dont have time for it anymore. This is where ham radio is going, It is losing out to living.

I havent gotten totally out of it yet and am occasionally involed. Usually working on an antenna project thinking I will become active again. I have been asked to assist some girl scouts in getting badges but I am having a lot of trouble finding scouts that are interested although the requirements are very minimal

no I have done no such thing

I have been forgiving my enemies I forgive you Steve but please get
help
I as a person have the power to forgive my enemies
was not it Christ himself (a good rabbi i note although I rejuect the
claims that he the promised messaih) red read Matthew 5 6 and 7 if you
will blessed are the mercyfull for they will obtain mercy and so we are
called on (by from PoV a Rabbi your God himself) to forgive your
eneimies and such

I am simply taking the advice of Jesus Christ a course of action you
have from time to time demanded of me yourself then you turn around a
nd btch when I follow the wrod of the entity you beleve to be God

there is NO pleasing you Robeson

none at all

Blatant lies that you can't provide a single copy of a post of,
Morkie.

Mark C. Morgan is lying. Period and end.

Nope.

Nope.

YOU are.

YOU were the one bragging about your in-laws in Wisconsin.

It's YOUR stupidity that gave them to Wiseman.

YOU put the information out there, fatboy.

YOU are responsible.

Nope.

Not a one of them.

And YOU can't provide a single post that I allegedly made that
proves it...because it doesn't exist.

> I was concerned you might call My wife uncle whoose address you also
> listed and frankly I would not him getting into trouble should he react

Obviously not concerned enought to have not given the information
in the first place.

> ...Badly to such a lie being told about hs niece

What's bad is your constant subjecting of your "beloved" spouse to
the onslaught of humiliation that being your spouse brings with it,
fatboy.

Oh well...I can't be THAT far off.

But YOU have refered to him as "elderly":, Mork...So what's your
story THIS time?

No one "teased data" out of you, Mork.

You were stupid all on your own.

A man who loved his family wouldn't "take advantage" of them in
this forum for "newsgroup points".

I am sure the surgery went well.

No one except YOU is "making stuff up again", Mork.

Neither of us are "criminals" nor are we "conspirators", Morkie.

Because a caring and prudent man wouldn't give out such personal
family information in THIS flamefest.

Which of course you AREN'T, so that answers that.

> you ut out the addess I was concerned you might follow them up in ways

Which is to say you were selfish and uncaring.

But we knew that.

I do use and understand English, Morkie.

You're the putz with the comprehension issues.

No one, least of all me, is falling for your ruse.

No libel at all.

I doubt it, Morkie.

Not after I send him some of YOUR posts...Including the ones where
you obviously endanger HIS "daughter's" health and welfare with your
deviant behaviour and use HIS personal information to YOUR gain in a
flamefest newsgroup.

> > I'm not that gullible, fatboy!

I face them very well.

You're a liar. That's established.

You got caught in yet another one.

That's a fact too.

Event horizon?!?!?! WTF does an event horizon have to do with EME?
You just keep showing your ignorance more and more!

An event horizon is defined around general relativity's description of a black hole, a celestial object compact enough that no matter or radiation can escape. This is sometimes described as the boundary within which the black hole's escape velocity is greater than the speed of light. Are you saying that the moon is a black hole?

Yes. That's understandable. Hams these days don't want to act like hams,
they like to be appliance operators. So kids don't see that CW is
important and fun. All they see is hams gabbing on a microphone like any
CB'er can do.

You have been taken in by the oldest scam in ham radio. Your logs
mean nothing because you never did moonbounce after all and just
talked to a guy with a 100 mw qrp rig somewheres nearby. We are all

You have been taken in by the oldest scam in ham radio. Your logs
mean nothing because you never did moonbounce after all and just
talked to a guy with a 100 mw qrp rig somewheres nearby. We are all
laughing at you.

assuming the above were true you poroved or admited or claim that K4YZ
assertion that I have fraudulently made these is false

but it would take 8 or 10 transmitters to dulicate the contion on my
spectrographic display where I pck out the signals to decode meaning 10
opertors or so

further since my station is EME class if a small one you can't know if
I am not making some real contacts along with the aleeged fakes ones
to acomplish this fakery would require oe or more person in the UP
knowing enough about moonbounce to foool someone that had reasearched
the matter throughhly and nobody here seem to know much about moon
bounce

you in claiming knowledge of such aan onperation are admitting to being
part of an effort at harrassement

frankly you don't convinvce me of your claims you are just trying to
gaslight me

well done nice fakes I suppose you are pleased I am glad at least some
of the station have confirmed that Ow orked them by email and are
anxoius to confrim what I need to for a qsl card

of course in a couple of those cases I supose the email traffic could
be faked as well
but since my staion should be able to EME I expect I have some real
stations in there

I shall see

and My wife wants to thank you for really making a good impression of
Ham radio

I will use the buro to try and qsl all the forgein contacts I have not
decided what to do about the domestic stations

Huh?

Is it REALLY too much to ask to ask you to work on your English
composition, Mork, and to try to organize your thoughts a bit
more...uhhhhh...rationally?

> I shall see

Why?

Was she party to your EME fiasco? Was her callsign in there?

> I will use the buro to try and qsl all the forgein contacts I have not

Again...more irrational whinings.

However, is it REALLY unexpected that you should brag about some
"accomplishment" in this flamefest newsgroup...the SAME flamefest
newsgroup where you have ALSO repeatedly bragged about your "policy"
about LYING, and then not expect that someone would doubt you...?!??!

Are you even REMOTELY getting the message here that LYING,
especially BRAGGING ABOUT LYING, is ALWAYS a bad thing, Mork?

How the heck can someone know that the ohm is the unit
of resistance without memorizing it? How can you possibly
develop Ohm's family name from first principles? I
memorized the ARRL License Manual in the early 1950's
in order to obtain my first two amateur radio licenses.
Memorizing license manuals is absolutely nothing new.

I "may" be going out on a limb here but I THINK I may have figured out what Al Klein is speaking of - possibly misrepresenting his line of thinking in the scope of things - thus causing the confusion.

I THINK his idea of memorization or what he is referring to is as such - lets say you have someone who wants to pass their ham exam. They buy a manual and instead of reading the damned thing to LEARN the ins and outs of ham radio, applicable theory, rules, regulations and so on - they simply try to memorize each answer which is shown as the right answer - merely by A, B, C or D. Some clown I knew, tried this - he didn't take into account that the tests were not always in that order - when it came to the answers.

Am I correct Mr. Klein?

No the message I am geting is that you have no honnor by any standard I
have ever seen

I did not lie about eme contacts at all

therefore I did not brag about lying indeed I have never braged about
lying

that is another of YOUR libels

I admit that I find nessary to lie at times

and this just reinforces that

So, it would seem the op knowingly and willingly made contact with
station(s) known or suspected to be using a false method to ID?

On second thought, the op simply may not have had the basic required skill to determine how a true eme signal should be received. He may not be suited per FCC rules to hold or continue to hold even the entry level technician ticket. Really, thats no flame intended. If he is that stupid he could hurt himself playing with RF!!

Honey, you really shouldn't use Nair on your scrotum. The active ingredient is highly toxic and could produce genetic mutations in your sperm, causing birth defects like kinky hair, flared nostrils, everted lips, and bubble butts. You don't want your poor innocent children to look like niggers, do you?

That's exactly what I mean. You're misrepresenting "memorizing that
the answer to the question about the resistor with the orange band is
10,000 ohms" is the same as "memorizing the color code".

To paraphrase Maxwell Smart, you're thiiiiis close. Substitute "the
correct answer to each question" for "A, B ..." and you've got it.
Some things have to be memorized - you can't, as Cecil tells us,
derive laws from first principles - but there's a difference between
"the answer to the question about the oscillator is the .001ufd
capacitor" and learning the basics of a Twin-T circuit.

Well then, cure the ignorance. Wouldn't that be easier than learning
the code?

I "may" agree with you - in part, but we all know thats not going to happen!
It is a matter of human nature.

after all my problem have always come from being too honest and too
open

I should have allowed the ve's of the day do as they offered and take a
passed code (recieving) from one session and put it with a passed code
test (transmitting) lallthose years ago they were willing and offered
it to me but no I was too honest

or in my early experimental days with sexuality I should have made sure
never to be honest and admit to being Bisexaul

I should have lied and stated my wife was male then steve would either
left it alone or called me a liar and then I could confess and she
could be female without question

I should have described my eme preps and 440 band not 2m so when I
operated the spoofer would not have been looking in the right band

Indeed only lying MORE would have avoided my problems here on RRAP that
is why form the moment my son is born this Feb I will be considering
how to teach when to lie (often and throughly) and to trust no one

Listen, Dimwit. A question may imply just about anything, but it is NOT
libelous. Ask any politician who has been questioned by the Press. It is a
question. Libel is a false statement made about another, not a question
asked. Perhaps you have a guilty conscience?
Take your tale of woe to an attorney, Mark. Whine to that attorney that
"someone" whose identity is unproven, "implied" anything via a simple query.
This is hardly grounds for YOU to accuse someone of Libel. In fact, Mark,
take your tale of woe somewhere else altogether. Your mental superiors have
been dragging you over the embers for several weeks now and you still seem
to not be capable of grasping that fact.
Another fine point of Libel is that, should I say, "In my opinion, Mark is
lying about his EME contacts." that is an opinion, NOT libel. If I were to
make a simple statement, "Mark is lying about his EME contacts.", well, that

might be construed as Libel though hardly actionable by any court of law.
So, Mark, in my opinion you are spamming this group with your near insanity
and pointless posts.
Got it? Get your facts straight.

Mine ARE straight. Neither myself or Steve or most others have made libelous
comments. Roger Wiseman, on the other hand, is another question. Yes, he HAS
made numerous libelous statements, but the onus of proof is upon you, the
person allegedly libeled, to prove the fact. This will be a difficult task
for you to undertake, Mark. First, finding an attorney, any attorney, to
take your case will be nigh unto impossible. Second, the cost involved for

what stalking? I have never threatened him or his family.

besides I would not be the sole plaintif in the case very likely nor
wismen and Robeson the sole defendants

I have was I even even on use net for 4-5 of those tyears and he
contiued (abet at a lessor volume) to post peotencaily libelous

Stalking is not defined by one making threats...get some legal input.

are you using an ex Ham transmitter?
I hear with LSB/USB get further than AM but is the LSB really wide enough
for quality audio? Got a grandpappys MP1000 here that will rag 50 watts AM
all day long, but the band width is to narrow for anything like nice music
audio... Speech is nice though. Maybe there is a wider AM filter than stock,
some Ham wizardry to make it fit a decent audio element on to the carrier,

The frequency he is using is legal with an output of 10000uV/m at 30m.
That's a pretty good signal just to play with. This can go quite a long ways
via skywave, and even a good distance via ground wave with a sensitive
receiver.

yup that's QRP alright.

I'm alomost 69 years old and have forgotten most of what I learned in college.
But I still remember what I learned in High School ... how to copy Morse code.

I still remember what I learned in grade school ... how to ride a two wheel
bicycle.

Now, if I could only remember that name of the woman I've live with for the past

no empty threat made

indeed no threat of litigation made

that the problem you and steve insist on making

you claim a statement means more than it does

I have claimed I am looking into the mattter. I am

I have discussed the matter with an attoney. I have.

I claim I have an appoinment to go over the matter further. I have

>You have not the financial resources and nary an attorney in

I certainly have the resuorces that is another mistake you make "not
lloyd"

and nobody said I was limted to my area although I have not consulted
with an attnorey in Wisconsin or Texas or Indiania or Illinois. Why
the other states? good question I have mentioned I would not be the
sole Plaintiff. Indeed based on some of what my reasearch I might not
be a plaintiff at all personaly, but your firends (wisemen and Robeson
have spreading around the libel of my family (of which only I post
here) pretty generaly, and I realy don't who sue them and the other fat
target in my sights, as long as it get done

Not sure if I can sue but surely intend to find out

and If can or a member of family can, (with a reasonable chance of
sucess) it will be done

Indeed another goal of my research is to see if I can locate the law
and lawyer in WV and provide enough to enable Dave Hiel to move aginst

Wisemen. if my reasearch provides merely that at this point I will aprouch Dave heil who dispte our differences might be willing to ally as the enemy of my enemy theory

Omega One Radio is on the air now on 13.556.00 MHz on Lower Side band.
We have fixed the audio so the audio is a lot stronger now, then
before.

It's hard to figure out what you're actually trying to say sometimes Mark,
but what it looks like you were trying to convey to the race organizer is
that you're retarded.

The Sunspot cycle is high however, we've had some solar storms so the
band conditions aren't very good right now.

Here is the truth about the sunspot cycle. We are now at or very near the very bottom of the sunspot cycle.

I am in NC, and I could hear music on that freq around 9 am dst, I don't recall the exact time.

I have a 52 ft vertical, and QTH at 4200 ft above sea level.

I'm running a homebuilt transmitter. LSB seems to work for me because
I'm not running the transmitting in stereo. I think you might need some
better filters on the AM transmitter.

Farnkly I hope so. OTOH if it uits me and and becomes clear dave hasn't
dealt Wismen I doubt he will object to receiving some legal citations
and other material he can use

If Heil deals wth Wisemen then I don't have to

but Heil has become my deafcto ally agains t both Robeson and Wisemen
where it counts by calling Wismen (and thereby Steve's) allegations I
am child molestor a lie he serves my ends as well

>Besides, you have your hands full enough
> as it is with your stalking of Robeson.

I am not stalking Robeson.

Indeed Robeson can stop this at any time he chooses. He has but to
retract his accusastion that I (or my father or any mmeber of my
family) have comitted any criminal action that he alleges, (that
includes his allegations that I am child molestor, a rapist, that my
father has abused, that I or other have cominted fraud have been
forcibly confined) and agree to stop making sexuality an issue in RRAP
and the Radio NG maning he must stop accusing anybody of being who
does not come out of the cloest on their on desist from make his un
suporteable accusation that BGLT's are mentaly ill Finding of the APA.
Or alternitively he can agree to leave, or perhaps if he has some other
proposal something else could arranged

indeed if I knew who you have also comitted actionable libel by making
a unfounded accusation of a criminal nature calling me a retard or
faggot is one thing Lloyd accusing me a crime is another

I can easily prove I have never commited stlaking by being prove that I
have not threatened him with bodily harm (informing him that Iwill
exercise self denfense if he approuch does not count)

from my blog http://emekb9rqz.blogspot.com/

having not yet the resources to bypass the jamming I will largely cease furth Moon bounce work although I have to best of belief acchived it on 4 seperate QSO's and then certain folks deciding that they did not approve decided to break FCC and set up a bot that answers my cq calls with false responses

as I posted when I started I knew I might not make it but was going to try

I knew I might this time although frankly I never considered that the reason I would fail would be jamming. OTOH I havemade a QSO (SSB) over a geat distanceto what I though was possible it full of satic but the single 13b2 can be mounted for better use in torppo and will be and next year likely joined by another and an abilty to aim the attennas better

right now my staion can likely make a sked if the sked involves work split, the jammer is working but sensing my sginal and fillingn my transmit freq with RF so I can't hear real echos or tell them from his faked replies but the jamming is coinfined to my TX freq I have worked a split qso near moonset and I knwo that contact was valid as we took pains to make sure, as QSLing viathe buro system takes awhile it will be a while before I can prove it but I KNOW I have the at least 1 EME contact

I hope you are satifed with your handy work

drop me a line for a sked and plan on working split if youask for one

no checking ggoles archive clearly shows otherwise I left the usenet
althoughter from 2000 to 2005 and yet steve make posts about and

molestor charges till after I had left the NG

I leave he slows down and makes the charges less often gainst abut

but acusing me of being a Child molestor is accusing me of a crime Not
lloyd

he can call me stupid all day so can you.

Lloyd you have accused me of crime. Stalking is a crime. Seems realy
silly to have to say it but if you say someone is stlaking you are
accusing them of a crime

I am not stalking steve I posted on RRAP from about 1998 to 2000 and
then again starting in 2005 to date

but as someone quoted last year the michigan staute on stalking threats
area required element of the statute therefore if someone can prove
they did not prefrom all the required elements of the crime they can
proove themselves innocent of that crime, and further the bruden is to
proof that the accused is guilty not the other way round
>ou are on record, Markie, and there are

most likely in excess of a thousand, but your point?

it seems to be that you are alleging in choosing to defend myself I
lose the right to defend myself
>Google has your

some of my posts would compcate the matter I agree

that is one reason of course I may not be the one sueing him it may
well turn out the best plaintiff is not myself but my father or my
father in law or my wife

>In fact, Mark, Robeson already

he can try to file them but he will have trouble justifing that when
his his post about me after my return he choose to accuse me of federal
and state crimes, his first act upon my return to RRAP was to libel me
at that point I had not posted in RRAP for rough 4-5 years
> If you had half a brain, and you show no indications of such, you would get

why should I worry?

I beleive Steve (foolish as that sounds) when he claimed last December
has contacted a lawyer and was informed he had a case. I beleive that
and then the lawyer looked at his cleints action and likely also found
that the client (who has claimed I could be confined to jail in TN for
something related to another civil suit he was going to file) found out
hteve facts were not exactly as stevrealted them to the lawyer. (to be
clear I am NOT syaing Steve LIED to lawyer I saying I beleive steve
left what out matters that were legaly relavant, not to comite fraud
with the lawyer but simply because he did not reconize them as
something the lawyer needed to know. I am stating that steve desn't
know legel matter that well in my opinion)

posibly but certainly no harm in furtehr reasearch not lloyd (i do wish
youd choose a name to call you though not lloyd is so akward

why this is a written furom

but realy the sentence is English some would say it needs a comma
between the last "lawyer" and the end phrase "to sue"

Indeed Robeson can stop this at any time he chooses. He has but to

Robeson is not the one at fault here, Mork. You are. And if Robeson were to

solution in this context likely means roger death or serious injury is
a phrase choose becuase I beleive that is truely the only ay to stop
him, and fear (from the rule of law) that Dave might accualy refrom
some serious violence to the man. It would benifit me yes but remeber
Dave would not be doing it to serve my ends indeed knowing it would
relive ME of wismen as a pian in my rummp might serve to disaude Dave

Dear Mork,

I can, at times, understand that you blast through your posts in this forum, never taking the time to proofread or correct your typos here in an effort to spam the NG as quickly as you can.

But on the suggestion of a third party, I reviewed your most recent QRZ "profile" for KB9RQZ, and sure enough, more than enough errors to keep the most morbid of flat affected persons rolling off thier chairs in laughter.

What an idiot you are.

It was bad enough that you were too impatient to file your change of address with the FCC carefully. That a simple change to a post office box number looks like you were in the middle of a seizure while doing it.

Now you've taken what is effectively the "first impression" that other Hams have of you (Your "QRZ" bio page) and simply proven MY assertions that you're an idiotic punk with an ego problem. That whiney line about "other hams" was nothing short of assinine and childish.

For Christ's sake, man... if you're going to insist on taking your snivvling newsgroup behaviour to QRZ, at least get your "wife" to write it for you! You'll still be a snivvling little punk, but at least others won't think you're a functionally illiterate snivvling little punk.

It is a shame that one or two individuals spend so much time making fun of Mark Morgan. I am a friend of Mark's and grew up not far from him. I've known Mark most of my adult life and feel that I should come to his defense.

Mark was always a nice kid and never made much trouble in the neighborhood. When we were in seventh grade Mark had a crush on a gal who had a Daddy who was a rapper. Mark would leave her Stickum love notes and tell her he "luved" her. The first love of his life got pregnant a few months after. Mark was devastated. She was only fifteen, but had been in seventh grade for three years.

Mark moved on and soon found other gals to pursue. He had little luck, however, but did find a little 300 pound sweetie that suited his fancy.

Unfortunately for Mark this budding romance fell by the wayside because the gal was his cousin. His parents put a halt to that because they know what can happen when cousins date; They are cousins, too.

Mark never did have a blow-up doll for a bed partner. Those who say he did are liars. He didn't need one. He had made himself a rabbit fur mitten that he called Alice, and he'd get Alice out and take advantage of her after his parents went to sleep.

To this day Mark keeps Alice under his pillow. She is his one and only true friend in the dark night hours.

Please stop picking on Mark. He means well but he is not "all there", if you know what I mean.

lloyd

he can call me stupid all day so can you.

Lloyd you have accused me of crime. Stalking is a crime. Seems realy
silly to have to say it but if you say someone is stlaking you are
accusing them of a crime

I am not stalking steve I posted on RRAP from about 1998 to 2000 and
then again starting in 2005 to date

but as someone quoted last year the michigan staute on stalking threats
area required element of the statute therefore if someone can prove
they did not prefrom all the required elements of the crime they can
proove themselves innocent of that crime, and further the bruden is to
proof that the accused is guilty not the other way round

most likely in excess of a thousand, but your point?

it seems to be that you are alleging in choosing to defend myself I
lose the right to defend myself

some of my posts would compcate the matter I agree

that is one reason of course I may not be the one sueing him it may
well turn out the best plaintiff is not myself but my father or my
father in law or my wife

>In fact, Mark, Robeson already

he can try to file them but he will have trouble justifing that when
his his post about me after my return he choose to accuse me of federal
and state crimes, his first act upon my return to RRAP was to libel me
at that point I had not posted in RRAP for rough 4-5 years
> If you had half a brain, and you show no indications of such, you would

why should I worry?

I beleive Steve (foolish as that sounds) when he claimed last December
has contacted a lawyer and was informed he had a case. I beleive that
and then the lawyer looked at his cleints action and likely also found
that the client (who has claimed I could be confined to jail in TN for
something related to another civil suit he was going to file) found out
hteve facts were not exactly as stevrealted them to the lawyer. (to be
clear I am NOT syaing Steve LIED to lawyer I saying I beleive steve
left what out matters that were legaly relavant, not to comite fraud
with the lawyer but simply because he did not reconize them as

something the lawyer needed to know. I am stating that steve desn't
know legel matter that well in my opinion)

A name to refer to me by? You can cease attempting to ingratiate yourself

I am your intellectual superior. I am in no way one of your compatriots.

Aiming your 13el 2 meter antenna at your beer to see if it will
heat to the point of popping open for you does not count as an EME

What will be sadistic is YOU sending THEM a QSL card.

Let the guy who made those QSO's for you do it. It's a fraud
coming from you.

Title from one of Mork's "blogs"...

"KB9RQZ man with the knee high EME anttena"

First of all, no one here thinks of you as a "man",
Morkie...You're something in between.

Secondly, only an idiot lives at your lattitude with a "knee high"
EME system.

And Lastly, it's "A N T E N N A", you illiterate jerk.

well accusing me of fraud is more libel steve

and make up your mind

first the QSO's never happened then you claim somebody else made 'em

who do you sugest made em My wife well you used the male pronoun to refer to a female in that case

nope you are lying there

you know nothing of the sort

you think you do but you don't know and neither do I although based on the pattern they came in in the first pace I belive the first 5 were deifnately proper (and I have email from 2 of them which ofcourse could be fakes since they are forgein station with out email addies in thier QRZ listing

right now I am locating persons able towrite in the langauges of the forgien contcts I belive may well be valid and I didate a letter of explanation, send with my QSL card irc (or 2 and envelope) in the letter I will ask them to conrifm or expressle deny the the contacts. I hope the hams overseas will be helpfull to answer such a plea

In 3 other cases now I do claim the contact they are USA calla and 2 of them have email addies that check out in QRZ claiming and seeking to confirm contact with me via Metor Scatter . I had not considered this and frankly am I impressed to three sates to my log without it being by the EME path I adknowledgeI a made a mistake in claiming them as EME/ I believed them to be at the time. They are however still contacts and if it were safe to say more I would

no I said there is ONE I am certain of there are 4 more I beleive
highly likely

in addtion havingnread todays email I believe 3 or more of the
contacts are likely Metor Scatter rather than EME I adknowedge the
error

Indeed thanks to the effort of another I don't exactly what the truth
is in this matter

after all it apears Wisemen and DAavies agree that I have been spoofed
a either a bot or another ham playing creul games with me.

anytime those 2 apeer to agree Gods knows what is up Indeed I have

steve I certainly believed I was making EME contacts

making contact is supposed to be fun ? isn't it?

I thought I was achieveing someone I have dreamed since became a ham.

I was Happy and joyous and bouncing off the ceiling since I thought it
was happening and going very well at that

what deceit I made what I thought were contacts
my mistake was anouncing my plans where my foes could read about them

I also was mistaken in thinking they might show any respect for a real
achievement
>
> > I did not lie about eme contacts at all
>

no I told no lie in the EME matter

I set up a staion that should be able to do EME per the advice of
several websites
http://www.vhfdx.net/jt65bintro.html
there is one and line quoited from that webstie
"Do you have a directional antenna, a 2m SSB transceiver with 50 W
output and a PC?"

I lined up a 100w 2m ssb unit a 13b2 anteena I obviously have a pc and
went went and trired it

indeed my first few nights I struggled wait and receveied for my effort
one contact each night for more than an hours effort. Those contacts I
will seek to confrim, then I started geting some more with less effort
I was geting the hang of it was all then thing went realy well

I related the events as I belived they unfolded

perhaps with you

but it prooves to me beyond all doubt that lying a generaly the best
policy

did no one believe me?

I think even Dave believed me.

I know from my email thata few people Lukers that have never beleived
anythigng I typed on here have said they now believe

of course you will likely now clai m it was part of my plans in the

sure it is I lie as everybody lies

some like you tells lies to attack and harm other people, to creuly hurt them

some lie becuase they fear the truth for some reason (you apear to fall in that gruop as well)

Other tells lies to avoid hurting people feeling

stil others tell lies becuase they can't help it for reason of mental illness

I lie to imporve the safety of my self and my familiy I also make No bones about that

claiming the EME contacts (if I were jst lying ad making them up) does not improve my safety, indeed I knew when I did that it would result in vicous attacks being made in this forum therefore it does not protect me, so It is not something I would lie about

If someone such as Lloyd really wants to see Mopey Dopey stroke out, all he would have to do is make one phone call to the below person and notify him that Steve Parks is posting his name all over Usenet; and I suspect the Georgia Bureau of Investigation would uncloak little Mopey Dopey with a set of interstate federal felony charges. Anyone who suspects that they know the true identity of Steve Parks should use the below snip of his post to call this person or the GBI and start the ball rolling.

Tsk, tsk, over half a year gone by and this newsgroup
seems to have become purely a DIN of INEQUITY where some
sociopathic middle-school-male-macho-misfits see fit to
insult and demean each and every other denizen who
doesn't make nice-nice with them.

Ah, yes, this is the "future of USA amateur radio" where
there be nothing but internecine warfare among morsemen...

>Dear Mork,

Are you "Mindy?" :-)

> I can, at times, understand that you blast through your posts in
>this forum, never taking the time to proofread or correct your typos
>here in an effort to spam the NG as quickly as you can.

Tsk, tsk, tsk, are you giving out an "F" on "proper procedure,"
Mindy English Teacher?

Maybe you ought to vent your outrage to Paul Shrek, er Schleck,
or whatever, at this terrible "crime" against amateur radio?

Maybe writing a nasty letter to the ARRL would help make things
"right?" Just think, QST might even put in their Letters to
the Editor column and make you more (in)famous?

> But on the suggestion of a third party, I reviewed your most
>recent QRZ "profile" for KB9RQZ, and sure enough, more than enough

>thier chairs in laughter.

"Their." :-)

Tsk, tsk, tsk, you are WAY too eager to laugh at others. [Is that
how you got snot on your moustache while posing in your poopy suit?]

Who was the "third party?" One of your alternate personalities?

> What an idiot you are.

Not a very nice thing to write, is it? After all, you are now
a "commissioned" ossifer, er, OFFICER in the USAF AUXILLIARY.
Are such attitudes taught at the Air Academy?

Oops, I forgot...you did NOT graduate from the Air Academy. My
apologies. Of course, you didn't go through any TN State Guard
OCS, either, did you?

> It was bad enough that you were too impatient to file your change
>of address with the FCC carefully. That a simple change to a post

Here's a clue, Mindy: QRZ does not grant ham licenses, either by
itself or in concert with the US federal government. Whatever is
on the QRZ website is up to QRZ.

What is your problem with the US Postal Service? They grant
Post Office Boxes, not QRZ, not the ARRL, nor the FCC. A Post
Office box address is perfectly good for sending mail via USPS.

> Now you've taken what is effectively the "first impression" that
>other Hams have of you (Your "QRZ" bio page) and simply proven MY
>assertions that you're an idiotic punk with an ego problem. That
>whiney line about "other hams" was nothing short of assinine and
>childish.

Oh, my, you got off your medications again? Tsk, tsk.

DEFINITELY not what is taught future commissioned USAF
officers at the Academy!

Tsk, tsk, tsk, without ANY "third party suggestions,"
I went there and read Mark's bio...and also Major Dud's
bio. There is actually much less content in Mark's
submission with NO hint of either assininity or
childishness. It is short and declarative, naming no
one else. There is NO hint of "ego" problems there.
There is some evidence of dyslexia but not a great deal.
No more so than is common with many self-written bios
seen on QRZ...by those who do NOT admit to any problems.

But, going to Major Dud's bio is something else again.
Anyone (without "third party suggestions") can go click
on the link provided by the "major" on his QRZ page to
get Major Dud's homepage and see a larger version of the
infamous poopy suit pose under the banner "A MAN OF MANY
TALENTS." :-)

Oh, my...A MAN OF MANY TALENTS!!!

[everyone, quick, contact Who's Who in America to
have this MAN OF MANY TALENTS included in next issue!]

"Talent" at WHAT? Sucking in a gut while posing in a
cheap surplus flight suit? [doesn't the CAP authorize
full-dress uniforms?] Blowing snot on your moustache?
You didn't even comb what hair you have left for the
photo...

One DEFINITIVE LACK of "talent:" The ability to posess, print, transfer to electronic form a single image of ANY past claims of glorious "service" to anyone, especially in the USMC. Nothing. NOTHING. N-O-T-H-I-N-G.

One reason for the nothing is that you've never done what you say you have. It's all pure fabrication on your part. You want to BE someone...so you impersonate them...and then get way-over-the-top angry at those who call you out on your claims. Tsk, tsk, tsk.

Let's see...first you came on like some veteran "gunnery sergeant" of the marines, all full of (what you thought were) "correct phrases." [anyone watching TV shows and reading old paperbacks could get all those correct USMC phrases] Then you started to mix them up (must be hard to be a poseur for so long). REAL vets wouldn't do that... those are a part of their psyche.

Big failure to provide ONE bit of evidence at all that USMC service. Then you got all angry and outrageous at those of us who had REAL evidence viewable elsewhere. Major Dud, you got tripped up by a REAL Marine vet so now you hardly mention those "18 years" of "service."

Then there was the claim of "working in engineering" as a civilian. You "knew all about engineering" but it turned out you were just a purchasing agent and the job lasted less than a half year. [purchasing agents are NOT normally engineering staff at any electronic company] [I'm betting you were fired...]

You've tried several other forays into areas where you have NO experience, including aerospace and space business but got short-stopped by those who've ACTUALLY been IN it.

Now all that comes down to presenting a picture of the "top" license class in the US amateur radio service. Is that to be exemplified by outright fraud in claims, of living in some radio fantasyland of imagined heroism of being able to do what others cannot? Well, is it?

That sort of picture you present in here (a supposed forum to discuss "policy") is a NEGATIVE. It helps no one, not even yourself, although it must be some form of mental masturbation for you to write things like:

> For Christ's sake, man... if you're going to insist on taking your
>snivvling newsgroup behaviour to QRZ, at least get your "wife" to write
>it for you! You'll still be a snivvling little punk, but at least
>others won't think you're a functionally illiterate snivvling little
>punk.

"Snivelling." "Behavior" (for American English). :-)

If you wish to be some "master of English," Mindy, try not to make so many mistakes of your own. :-)

Is one of your new, budding personalities going to of the clergy? Or are you going to just preach to us in the usual insulting fire-and-brimstone manner you seem to love?

>Steve, K4YZ

>Steve, K4YZ

Which personality wanted his own "signature?" :-)

Okay, back to another half-year's wait or until the optimism at all these middle-school-mindset-male-macho-misfits go wising up is gone. PTUI.

Robeson insists I am stalks him and yet HE goes out and checks my qrz.com bio and drags his coments back here in to throw more fuel on the flame war\

He and Wismen call my eme enterprise a failure.

they and anyone else claiming this are worng. If indeed I do not have any contacts on EME path I have not failed that would mean I have simply not yet suceeded.

I will do eme I believe I have done EME on 2 m already I wil upgrade my gear over tie and Do so again (or if needs be do so for the first time)

I will also do EME on 6 M 70 cm ad higher band If can find a another staion to work I will try 222 mhz Eme and 900 mhz eme

I state the only way to stop me is to kill me. it is within the power of others to delay me nothing more

this is KB9RQZ/AE (soon enough) and you have My call on it

Heh heh, ANYTHING that Major Mindy Dud posts is little but
outright insulting of others. :-)

"Ally?" Hardly. Not with Major Dud's attitude.

An "alliance" with another might last 5 minutes at most. At the
first disagreement on anything, Major Dud would go ballistic
as he has done with others in years here.

One has to IGNORE these malcontents. Their personal frustrations
have made them angry and they take it out on anyone they think
is victim material.

You CANNOT "convince" them in words. They must have THEIR way,
period.

The newsgroups and the Internet are prime for their malfunction.
No one is going to go hundreds or thousands of miles for a
physical confrontation over some newsgroup exchanges and no one
is going to do that to them. They feel safe in their insults
and general bad behavior...these newsgroups are an ideal outlet
for their anger. They can GET AWAY with it!

>Robeson and Wismen and thier cohorts wanted to make me cry and they
>suceeded.

DO NOT LET THEM DO THAT. It makes them feel they've "won."

They haven't "won" anything but a bad reputation on the 'net
but they don't see that. They think they are "tough" by
being insulting and dirty. All they are is angry and sexually
frustrated. Let them stew in their own juices.

>I hope they are happy at really ruining my month.

Don't bet on it. Chances are they are busy looking for other
potential "victims." Remember, they already think they "won"
but don't realize they lost.

>Truly the experence has been one to make spend some time reading recent
>cyber libel cases, and willing to try to peddle my case to a Lawyer it

Ain't worth it, Mark. All you would be doing is putting money
in an attorney's pocket. They will bill you whether you lose
or win a civil court case and not care one whit either way.

Thank you, Mark. I do have time, but not for teaching some of these pigs to fly. [I am NOT talking about the "Flying Pigs" QRP group...:-)]

My object in here was to try to get some sense in the amateur radio regulations by canceling that morse code test in this new millennium. The OFFICIAL arguments for that ended in November 2005 and not a peep out of the FCC on that since. It's now 9 months after the official close of Comments on that issue.

Most of the rabid morsemen who were in here are against dropping any code test and won't hesitate to insult and demean anyone that contradicts their sacred (self-righteous) view.

They had to do it so everyone else had damn well do it too!

In their minds the ARS stands for Archaic Radiotelegraphy Society and their morse keys will have to be pried from cold, dead fingers.

It is over three years since WRC-03 revised the amateur Radio Regulations to make morse testing optional to administrations worldwide. The USA is going to be one of the last to give it up at this rate...if ever.

That (once) effective group known as No Code International hasn't changed their opening Articles article in nearly a year. The chieftans there are apparently off doing other things and don't seem to give a damn about the issue.

No real problem. The beepers can have their fun imagining they are the Great Radio Operators of all time, "preserving the heritage of olde-tyme raddio." It's their fantasy land within the worlds of their minds. There's plenty of OTHER interests the rest of us humans can persue without being stuck in the 1930s of morsemen worlds...or being forced to kowtow to their sacred visions and directorates. :-)

As the people of Cuba cry out for liberation from the cigar chewing maggot dictator Fidel Castro, Frank goes down the litany of failed, and soon-to-be-failed, Communist dictatorships and shows how their disparities in wealth are used by the ruling Party Hacks in their own Aparthied to oppress their own people.

Communism is a system of Apartheid in Cuba because Cubans must use foriegn currency to pay foriegn stores for items they purchase. This relegates the Cuban people to a second class status in their own country, because the script Castro issues is worthless outside of Cuba. It is not the benevolent Apartheid of South Africa, which was set up to preserve the race and culture of the Boervolk, but a brutal and oppressive Apartheid that exists in Communist nations.

John explores the Mel Gibson controversy, showing the double standard of how the MainStream Media gives anti-semitic statements made by African-Americans a pass while piling on the criticism and attempt to destroy the career of a White, Christian male in the public arena. Also explored are the political and cultural aspects of the issue, which have been completely ignored by the MainStream Media coverage on this event.

Also, Jose Alvarez from the anti-Castro group, Brothers to The Rescue, calls in to give a first-hand Cuban perspective on the situation in Cuba... Kennewick Man update... Bill Clinton calls in with his spin on the week's news... your phone calls and more at 718-761-9996.

And you STILL haven't managed to get it right!

Gee! Three college degrees and you couldn't get through ONE
paragraph without looking like an idiot.

Of course a "degree" is no guarantee of looking that good...Look
at Lennie...He took FOURTEEN YEARS to complete a 2 year program and
he's no "smarter" today than if hed' just done his "twenty" at ADA.

The "so what" is that you are allegedly a thrice-degreed college
alumni writing about radio antennas. Even gradeschoolers know that
it's "A N T E N N A".

And YOU are the one "puting" yourSELF down, Mork...EVERY TIME you
add to your already massive list of stupid ramblings...

You seemingly decry censorship, yet you routinely get caught
back-editing your posts.

"...simpliar..."

Did you mean "similar", as in "like" but not exactly the same, or
"simpler", as in less cerebral therefore easier to understand (for you,
at least...)

Or perhaps, (and far more likely) you meant you were "SIMPly a
LIAR" and haven't read the book OR any other one like it.

Of course it's "beyond you", Mork...That's because it potentially
requires the education and experience of someone over the age of
6...Which pertty much leaves you out.

Fatboy, other than being stupid, depraved, deceitful and moronic,
I seriously doubt that there's a single thing in this world that you
can do better than I.

Lies are lies.

And when people tell lies to supposedly avoid hurting other's
feelings, the person told the lie finds out and is hurt WORSE that
thier "friend" would lie to them!

You and your family are not one iota "safer" due to ANY lie that
you've told, Morkie.

live. We know what you look like. We know (thanks to you) where you

Sure it's something you'd lie about, Mork. "Bragging Rights"

The "problem" is that you got caught AGAIN and have since made up
these innane stories about jammers tracking you and sending bogus
signal reports to foul up your EME attempts.

These people are not your "foes", Morkie.

That would imply an enemy-enemy relationship.

I bet most of the guys in here would buy you a beer and shake your hand...I would...I'd just be careful to not bend over anywhere near you.

The PROBLEM is that YOU keep making up one whild story after another, get caught in some foolish tale, then claim that by lying you are only doing what "everyone else" does, allegedly to "protect" your family.

Your QRZ "bio" is public domain, Morkie. YOU put it there for
others to read.

All I did was get a laugh out of it!

And as I pointed out in the original posting, had it not been for

Yep. That's him. Mark C. Morgan, KB9RQZ.

Morkie endeared himself to us starting years ago with his functionally illiterate ramblings about how he was a "drafted" colonel in the US Army Chemical Corps, and was being held on "active duty" against his will. Of course half the time he can't even SPELL "colonel" correctly, but he tried to bluff his way through on that by claiming he was such a hot commodity to the chemical corps community that they couldn't afford to let hm go.

But Morkie was too stupid to do the math...At his age he would have only been 7 or 8 years old as the last REAL draftees were being mustered OUT of the service, let alone sent to boot camp.

We've since been pummled with tons of various stories and claims as to his wizardry in radiocommunications, computer technology, alleged multiple college degrees, and of course, intimate details of his prefered deviant lifestyle.

Now we've been innundated with multiple NG posts citing his "EME blogs" with grandiose "logs" of his EME conquests...However now even HE has already backed off of that stating that it was "maybe only one, possibly four others..."

His excuse now is that an unknown third party "jammer" has programmed jamming "bots" to track him on 2 meters and send him false callsigns so he looks foolish...I say he didn't need anyone programming anything to do that!

My mind's made up. You're a lying fraud that's gotten caught up

I said they didn't happen all along.

Try ENGLISH, you fat slob! Had you really completed even ONE of
your alleged college degrees, you'd know that ENGLISH is a mandatory
second language in almost all of Europe and parts of Asia.

Of course you're as incompetent in English as you are any foreign
language, so perhaps you;d better get your "wife" to type those lettes

He was.

So you ARE the idiot.

OK...It wasn't "falsified"...it was "fantasy QSO's for future reference"...

In reference to your inquiry, no such unit "HMC 47 CSB

I guess that meant something, Mork, but again you refuse to focus
your thoughts, proofread your comments, punctuate them correctly, and
then wind up trashing the NG with even more silliness.

Isn't that illegal flushing trash down the sewer? The EPA would have a
field day at Markie's house.

Actually, knowing what Mork looks like, I think that calling his
"wife" a "shemale" is givng a bad rap to real shemales everywhere.

keep him on the "Don't Trust With A Glass Of Water" list.

I am sure that the word about Morkie will make the EME-circles
before long. He's already made it an issue to cross post to other
"VHF-UHF" NG's so I am sure they will blackball this idiot before long.

If one wishes to operate legally on 11 meters do not use CW or tone CW.
The only legal modes of communicating there is AM or SSB voice. Tone
maybe used as an alerting mechanism but not for other methods of
communication.

Even though licenses are not required and most (not all) persons don't
follow the regs there, if you are caught violating the regs there you
can be refused an Amateur License. It can and does happen from time to time.

no steve you are lying
I personaly can forgive my enemies

indeed the Young Rabbi from Nasseth in his words publishes Matthew
chapters 6-9 I believe (the seromon on the mount call on me to do
exactly that

who is William Anders?
Iit looooks like you emaled someone (with no reason for us to believe
it is was the army) and got an answer

Are you Mr Anders?

what is mr anders rank and title in the armed forces?

I can post email of the same sort of thing about your claims

after all my problem have always come from being too honest and too
open

I should have allowed the ve's of the day do as they offered and take a

passed code (recieving) from one session and put it with a passed code
test (transmitting) lallthose years ago they were willing and offered
it to me but no I was too honest

or in my early experimental days with sexuality I should have made sure

never to be honest and admit to being Bisexaul

I should have lied and stated my wife was male then steve would either
left it alone or called me a liar and then I could confess and she
could be female without question

I should have described my eme preps and 440 band not 2m so when I
operated the spoofer would not have been looking in the right band

Indeed only lying MORE would have avoided my problems here on RRAP that

is why form the moment my son is born this Feb I will be considering
how to teach when to lie (often and throughly) and to trust no one

1) mopy-dopy......ring leader

2) DrDeath.........general flunky and follower

3) LandLoad........wanna be ring leader,but only a follower

IN THAT ORDER!

Check it out because your lawyer may be interested.
The FCC may want to look into their road trip habits since they are not

Uh huh.

Exactly as I said it would happen...Excuses.

Morkie...EVERY United States Marine Corps unit I was ever assigned
to has an offical history to it, just as every United States Army unit
does.

This bogus unit of yours never existed. There would at least be a
record of it's existance.

There's NONE. That per this fellow who responded from Alexandria,
VA.

Your "tour of duty" never happened.

You continue to lie.

He's the fellow that the PAO assigned to answer my e-mail. Other
than that, I don't know who he is. But the Army seemingly trusted him
enough to have him answer my request.

As far as I know, he doesn't have any.

Nor do the 1 million other civilians who work for or are on

This is true! As the man said, tho most don't follow them - they DO exist.
They WILL be enforced - if so desired. Actually, an infraction of any radio
rule can deem you ineligible for not only an Amateur Licence but also any
other license from the FCC - even GROL. IF you hold a GROL and do something
stupid with it, it can cause your "amateur" license to be stripped.
Ignorance is no excuse. When you sign the forms - and your license(s) - you
agree to abide by the R/Rs.

Sure you do.

Read the definition of it, Mork.

You're "classical".

It's hard to "face" half of them since you can't effectively
express yourself in English, Mork.

Massive Lennie Lie noted.

Lennie's been solicited to engage in REAL radio discussions, ie:
microwave technologyu, and he spent more time arguing about doing it
than doing it.

Just like YOU have a great opportunity to "prove" that I am
mistaken in my allegeations of you, Mork, by scanning your diplomas or
getting that pic of "the little lady", Lennie would rather argue than
"just do it" when it comes to "real, meaningful intercourse".

And again Lennie's into his Anti-Amateur Radio rants, and again
his rants are trash before they hit the floor...

The "olde-tyme raddio" operators have been getting thier brass
polished by countless elected officials, federal agencies, the press,
and anyone else who had a pony in the Katrina race.

Again...Lennie's rants dismissable on the face of it by records of
fact.

That's deceit, plain and simple.

PS:

Unless you can show me a signed and properly filed Power of Attorney granted to you by your alleged "father in law", you have commited a FEDERAL felony by presuming to act as Eddie-boy's "agent" without his written authority to do so.

So go right ahead and tell us ALL ABOUT how you're acting as his "agent", Mork...I'll just add it to the disk.

You're correct - and just a few days ago - there was a case of a "licensed" individual who "allegedly" molested children and was convicted - the FCC was debating renewing his license. So, it appears they take a dim view on "criminals" being "license" holders. I guess they feel if you can't obey the law of the land, why would you obey their rules and regulations! I wonder if they take into account any one who's been convicted and had "successful" rehab? That would be interesting to know.

I once seen a copy of the "code" used by other countries. There were
"some" - if not many differences. I also seen a copy of "supposedly" the old
west code - used .... Man, what a difference - IF ALL WERE TRUE - that
is........ I'm only reporting what I seen, can't say for sure if true or
not. It was interesting to say the least.

Maybe - and I"m going on a limb here to guess - the "differences" in the
other countries code - was short hand much like our Q signals.

I hope the rest of you will consider doing the same.

Let's stop teasing Mark, and help me with the five steps below.
Thanks. 73.

SC

Step 1: No more automatic renewals. Individuals must retest and
pass all elements required for their license class.

Step 2: The passing score for written exams needs to be raised to 85%.

Step 3: Code elements should be 13 wpm for General, and 20 wpm for Extra.

Step 4: Make the no-code license one year non-renewable.

Step 5: Cancel your league membership until they decide to work
to improve things.

That movie was hokey. An alien invasion force with thousands of ships in

It is funny, but sad too. Radio ops where Mark lives like to tease him. I'm begining to feel sorry for him and I'm not going to pick on him anymore. I think he actually does try. Mark is like the little kid that follows everyone around and gets teased all the time.

It's possible but not very likely Mark could make an EME contact with the station he uses. The stations on the other end of the qso would need to have very good setups to compensate for what Mark's station lacks.

10000uV/m at 30m is the maximum. How much power into an isotropic
radiator give 10000uV/m at 30m. Of course, when the antenna has gain,
power has to be reduced to avoid illegal operation.

Morse code as used by Western Union (when they did code) is different
from International Morse code as used by radio operators. Not very
different but different.

That's American Morse, as opposed to International Morse, which is
used on the air. American Morse is composed of dots, dashes and
spaces. (Spaces are parts of the letters, not just the spaces between
them.) International Morse uses just dots and dashes - the spaces are
just spaces.

no I don't buy that either

while I do not propose to end written testing I do wonder if the ARS
might not be better off with a license that (like GRMS) that one BOUGHT
from the FCC with the money rasied thereby used solely to conduct
enforement action on the ARS bands

and Indeed an almost no test novice liiting the licensee to unmodfied
Hts and a staion set up by a full status with no or a very minimal test
might well be a good way to go

preveldges close to the old novice (but with 2m instead or adtional to
222Mhz)
and a test for full preveldegs afer that

exactly although several station on the web have set ups able to do so
I have posted links

I can not make a EME QSO with a station(both stations being) like my
own

I have now what I belive to real contact and sked with a station who's
published on the web log includes station of my gain and power. after
hopefully completing that Sked and seeing the log updates (they tend to
do once a month normaly but they had something burnout and were out

I'm not a no code fan either but....

In case you havent listened to the bands and noticed most hams are now missing....Ham radio is already dying without handing out free tickets.

The number of people becoming new hams is dropping monthly!

Soon the amount of hams dying will be greater than new tickets. Code or not....Its days are numbered.

Oh my, that brought forth the expected torrent of filth from your keyboard, UnWiseman. Dealing with you is almost like watching "The Exorcist".

As I expected, you didn't show up for the ARES meeting. That was predictable. What wasn't so predictable is the news that you've taken up with the old widower down the road from you. I hear you're at his place all of the time. I'm told that you don't have a job so you have plenty of time to hang out with the old timer. Does he know about your double life on the internet? Is he your invisible friend?

FBI'S "INFRAGARD" PROGRAM COURTS AMATEUR RADIO AS ALLY

>From the ARRL Letter

Amateur Radio's value as one component in a cooperative effort to protect
critical national infrastructure was the focus of an InfraGard
"Communications Interoperability and Ham Radios" summit this week in New
York City. An FBI program, InfraGard is dedicated to promoting dialogue
between the private sector and the federal investigative agency "concerning
critical infrastructure protection issues." ARRL Chief Development Officer
Mary Hobart, K1MMH, and Affiliated Clubs/Mentor Program Manager Norm Fusaro,
W3IZ, represented League Headquarters at the gathering, which featured a
range of speakers.

"This is the key to opening the door to a valuable model partnership,"
Hobart commented afterward. "They were very receptive. I think it was a good
beginning."

Hobart says Amateur Radio came up on InfraGard's radar earlier this year and
got the nonprofit organization thinking of Amateur Radio as a possible
partner, ally and service provider in emergencies. New York Metro InfraGard
put together the one-day session July 17 at Cisco Systems' New York office
as a way to get more familiar with Amateur Radio.

"They understand that ham radio has 'been there' in terms of emergencies and
disasters and is working to improve its ability to respond," Hobart said.
She said New York Metro InfraGard President Joe Concannon "expressed his
deep interest in Amateur Radio as a partner and a desire to learn more about
our capabilities."

Keynote speaker for the day-long session was Broadcasting & Cable Hall of

Famer and New York Public Television CEO William Baker, W1BKR. Jeff Pulver,
WA2BOT, chairman and founder of pulvermedia.com and cofounder of Vonage,
also addressed the gathering.

"This InfraGard meeting brought together a group of people who care about
post-disaster communication preparedness, and a majority of the people in
attendance were active members of the Amateur Radio community," Pulver
observed later in a blog entry. "This was my first time in the post-VoIP era
that I had a chance to talk to hams about my early experiences with VoIP and
how my ham radio background has had a positive effect on the past 12 years
of my life."

Pulver said the InfraGard meeting provided "a great audience to speak to,
since we shared a common passion for communications and common ground on a
number of topics." He said that includes the need for coordination between
the ham radio community and fellow communication enthusiasts "who want to
volunteer their time the next time disaster strikes."

In a presentation called "Radio Communications 101," New York City District
Emergency Coordinator Mike Lisenco, N2YBB, spoke about the Amateur Radio
Emergency Service (ARES) and the League's role in emergency and public
service communication and training.

Allan Manuel, an attorney in the FCC Public Safety and Homeland Security
Branch, indicated the Commission is willing to be more flexible in
accommodating Amateur Radio during emergencies and disasters. The FCC wants
to hear from the public by August 7 in response to an FCC Notice of Proposed
Rule Making (NPRM) regarding recommendations of the independent panel that
reviewed Hurricane Katrina's impact on communication systems (EB Docket
06-119). Some of the wide-ranging proposals in the NPRM include possibly
amending the rules to permit automatic grants of certain types of waivers or
special temporary authority (STA) in declared disaster areas.

For their part, Hobart and Fusaro demonstrated the League's "Ham Aid"
go
kits of Amateur Radio gear that can be rapidly deployed to disaster
areas
where the Amateur Radio infrastructure has been lost or compromised.
They
also provided attendees with copies of the ARRL's Community Education
Program brochures and materials.

Hobart says Concannon envisions a model in New York City that other
InfraGard chapters across the country could emulate. "I think it's an
opportunity for Amateur Radio to align itself with a high-profile group
with
key federal connections," she said.

The people who count know the value of Amateur radio, and also know the
absolute uselessness of cb.

And that would prove what?

Slow, you should be old enough to know that this is NOT a perfect world and that the ARRL is not a perfect organization.

However, it IS the -only- game in town. If your "boycott" works, people quit and the ARRL loses revenue, then they will be able to accomplish even less than you think they are accomplishing now.

Sorry, but your plan seems a little half-baked. Come back when you get over being slow.

Only the eleet amateur can bounce signals off Mars and make contact with DX and I have done it. No easy moon bounce stuff for us eleet radio ops because we are not like Morg Markan and need to steal gain from bigger stations. An even bigger deal is that it was done by Omega One Radio at 13.556.00 MHz using the new hyper modulation invented by AB8MQ last year (patent pending). Don't know about hyper modulation? Omega One Film Productions is producing a documentary about it to be released in October. Watch for it at a selected theater near you or else buy the DVD when it is released.

Next is Venus. After that we will attempt a distance record by bouncing a hyper modurated signal off Youranus.

It wouldn't. Is GMRS "better off"? What would the difference be? The
frequency? Is CB "better off"?

There are various types of radio usage - CB for communications - which
soon stopped working. GMRS for communications. Ham radio for
hobbyists. We don't need to turn ham frequencies into a preserve used
for communications - we have 2 perfectly useful - and *totally*
test-free - bands for that now.

The old novice HAD 2 meters. Just no VFO (and, IIRC, only CW and AM).

I have to agree. But I don't like any hams but marqueer is the worse. I
wish he'd stay the fuck out of the cb group.

The level is the same as emissions within the CB band:

Sec. 15.227 Operation within the band 26.96-27.28 MHz.

(a) The field strength of any emission within this band shall not exceed 10,000 microvolts/meter at 3 meters. The emission limit in this paragraph is based on measurement instrumentation employing an average detector. The provisions in Sec. 15.35 for limiting peak emissions apply.

(b) The field strength of any emissions which appear outside of this band shall not exceed the general radiated emission limits in Sec. 15.209.

I don't know that there is a difference anymore between Part 95 and Part 15 emissions in the CB band... the old Part 15, back when a license was required, used to be 100mW.

The amount of power applied to an isotropic radiator which will generate 10,000 uV/m at 3 meters is 30 microwatts. This assumes that the 3 meter distance is in the far field, or that it's measured in the far field and extrapolated to 3 meters as though 3 meters were in the far field, which is the method and assumption used by the FCC.

A simple dipole reduces the permissible power to about 23 uW, and ground reflections will typically nearly double the field strength, so a safe power level would be about 6 microwatts into a dipole antenna over ground for someone interested in conforming to the regulations.

The hams that plague RRCB also do the same in their own groups, essentially shitting where they sleep. They fight with us, they fight amongst themselves. The CBers have stuck together through all this. We have no infighting amongst ourselves, and I'm pretty damn proud of that, considering they (the hams) accuse us of this type of behavior on the air. I think if you use Usenet as a model for how people act on the air, the ham bands must truly be hell. No offense to the hams that have actually been kind or helpful to the CBers, but you guys really have some nut cases in your ranks.

Not true. Hams care much more about saving lives than operating appliances.
I'm betting a great number of them have their CPR cards,
ready for action. Self-cleaning ovens run a sad second place to standing
tall at the 911 center.

On your other point..
Most hams are men and they generally don't know how to operate any appliance
except the refrigerator door,
and maybe the microwave oven. A few are versed in toaster operation, I hear.

However; they will indeed spend hours installing flashy lights and
noisemakers on their cars, as well as
spend hours 'standing by' and preparing for the life-saving moment. They'll
spend grocery money to purchase a
plethora of other "necessary" equipment and "uniforms/ID/look-at-me" items.
Be it weather watching, crowd control, parade control, or just control in
general, hams are standing by to manage the world, after the "big one"....
Hams just like you, Dirk. And for that, I thank you.

I can only pray for peace on these hams as they spend their last days
brushing the fallen hair
from their rigs. Saving countless lives in the aftermath, diligently
tapping away; giving
needed instruction to all the elderly survivors crowded around their
homemade QRP
battery operated rigs..... Oh, and lest we not forget the generator owners
crowded around their swans, drakes and 101e's... burning precious fuel to
strain an ear
for the faint but all-knowing dit-dah that will be their salvation.
I'd bet with a 100w rig pushing a 600-1Kw amp [and a break in the fallout],
they could work weak signal maybe 10-20 miles
through the new noise floor.

As for me, I'll be listening too,
voice, morse and digital.
Coz by that time, the only appliance I'll be operating is that new
one-button rig from GLOCK.
....and I love ham.

LOL...
btw, trolls suck.

You claimed he has no frioends and his neighbors didn't like him. Looks
like you lied again. I hear you've been sucking Norm Stenger under his
desk you hang out under there all the time, so you can hide behind him
when your ex-streeetwalker wife isd at the mall. She turns tricks

Dear Mr. Robeson,

Thank-you for your e-mail of 01 August 2006

In reference to your inquiry, no such unit "HMC 47 CSB
(PROVISIONAL)" has ever been located at Ft Sill. Furthermore I find no

reference to any "214 FA BRIGADE" at Ft Sill or any other US Army
facility.

I hope this answers your questions.

WILLIAM C ANDERS JR

_____
the above is quote from steve recent post

he said he was going to write and try to comfrim my service in HMC 47th
CSB (provisional) then part of 214th FA 3 copr art Ft Sill ok

I knew he would not confrim the current location of the 47 csb at sill
indeed the unit I believe has been reorgaized out of existance although
the paerent unit of the formation the 47 th Feild Hospital likely
remerges from this I have heard they may be a irag but I frankly don't
know or realy much care

I did not expect steve to dare say the 214th does not exist (it does
http://sill-www.army.mil/3ca/214web/214th.htm)

but I welcome it as it serves as proof that Robeson has lied us and
therfore the claims I and other have made about his veracity (or
rather the lack there of)

inthat post the Major Of Cap has choosen to fake a comincation from the
US Army it itself. inded after this how can anything he has claimed
about any DoD matter be trusted

It would seem that Robeson admits defeat for the monet by quiting the
feild here in USENET but he will most like be back after he thinks his
misdeeds are forgotten

That'd be impossible. I don't have a Finnish ex-streetwalker wife.
At any rate, my wife didn't show up here posting Exorcist-like filth,
you did.

>>As I expected, you didn't show up for the ARES meeting.

I see. I write a message especially for him and *you* respond. You
were on the membership roles, UnWiseman old boy. Now you're not a
"meber". I guarantee that if you'd shown up, you'd have shown up stupid.

He isn't a near neighbor at all. He's an old fellow who lives considerly up the road to the north. He doesn't know what you are yet.

"Dioesn't"?

In the study of logic, one is told that it is quite impossible to prove a negative. Why don't you prove that you do have a job? It'd be very unlikely that you are able to show up at the old gent's place at all hours and stay for long periods of time if you had a job, Rog.

No, I claimed that he had no friends. I wrote nothing about "frioends". You're lonely. You need a pal. You've struck up this new relationship with the old timer out the road. He doesn't know about you yet. I bet his eyes would pop open wide if he read some of your internet offerings.

I can tell when you're starting to lose it, Rog. You write things like "streeetwalker wife isd".

Do things like conjuring up images of someone's wife turning tricks in a toilet or like envisioning your chief of police engaged in oral sex, turn you on, Rogie? You seem obsessed with 'dirty talk'.

What's your defect?

My 3 mW answer was for 30 meters. I think that ratios correctly to your 30 microwatts at 3 meters. Yes?

You mean you don't want your lie about somebody to come bite you in

Sure you do. You met the fat ugly whore in Helsinki. Her teel look like
they've been filed down so she looks like that dog that laps her
vagina.

He doesn't exist, since you can't provide his name.
You are a liar.
Name him, I'd love to pass along your posts saying a relationship
exists when it doesn't.

Then how could he be "friends" with a non-existent "widower" that is
all in yourt tiny little mind? I hear you have homosexual relations

And you are the one who spelled "valley" as "velly." Hypocrite.

>http://sill-www.army.mil/3ca/214web/214th.htm)

Mark, this alleged "response" to an e-mail inquiry is undoubtedly
BOGUS. Let's review the verity of Major Dud's posting:

1. There is NO verification available that such an exchange
ever existed through any referencable third-party source,
nor any other proof that Major Dud ever made such an
inquiry.

2. The respondent ("William C Anders Jr") is not identified
by position or rank and it is NOT written all-capitals
in any signature. Note: Even civilian employees of the

United States military have a position title which is used
for all correspondence.

3. If a military unit is mentioned, it is protocol (format)
for a unit to be spelled out for the first mention, then
abbreviated. This is for clarity in responding to non-
military correspondents (identifiable by headers in e-mail
when correspondence does not come over the military's
network).

4. It is extremely easy to forge a third-party "message,"
then include it as part of a message in here. That is
NOT "proof" of anything.

5. Contrary to Major Dud's claims, United States Army units
do NOT always keep careful records of their history. The
entire United States military undergoes periodic changes
in structure and new units may be created out of old ones
while older units may be dissolved. Any "history" of a
unit depends on the commanding officers' assignment of
historian duties within that unit, NOT considered an
important/prime task in that unit's mission. Neither are
unit historians typically "in contact" with other units'
historians.

6. Probably the best place for old unit information of the
United States Army is the Army Center for Military History.
They have a website with some limitation on available
information for non-military/non-government research. They
have permanent quarters with considerably detailed written
and photographic records for research by authorized
historians. The United States Navy has a similar
organization, also with a website. A careful web-search
will turn up their URLs.

>but I welcome it as it serves as proof that Robeson has lied us and
>therfore the claims I and other have made about his veracity (or
>rather the lack there of)

Major Dud BLUFFS his way through his claims on here. He makes
claims of his own and tries to pass off those claims as "truth"
(perhaps because he WANTS his imaginings to be true). Witness:

1. Years of claiming to be an active-duty USMC member yet NO
evidence presented in ANY FORM of claimed 18 years service.
Not one single digitized copy of any official papers, not
one photograph of himself or anything else taken while in
that 18-year service.

2. He has repeatedly challenged "call the VA" to "verify" his
service. However, the Veteran's Administration is NOT the
place to verify that nor will they give out full information
on a past or current service member to just anyone making

an inquiry. The archives of all service members are kept in the St. Louis National Archives Center and do send out copies of individuals' records but ONLY to IDENTIFIED individuals (or their identifiable kin). Copies require a small fee.

3. His claims of anything on QRZ.COM and his AOL home page are made only by him and are NOT "checked" or "investigated (for truth)" by either QRZ or AOL. Note that his biography now has him as "CHOP" (presumably an abbreviation for Chief Operator) of a second MARS station, whereas he had claimed earlier on the newsgroup as being "Assistant Chief Operator" on only one MARS station.

4. We have NO way of verifying that Major Dud is actually a "Major" in the Tennessee Civilian Air Patrol. He has a photograph of himself in a (somewhat used) flight suit with embroidered rank identification (of Captain) on it. He has not posted any CAP URL that has personnel listings on it nor has he presented any digitized copy of any CAP official records concerning him.

5. He once had a photograph of himself as a "First Lieutenant" in the Tennessee STATE National Guard (not affiliated with the federal national guard organization) as "communications officer" of one "brigade" (less than battalion in size according to the Tennessee State Guard's own website information. That "career" was short-lived and there are no records available of either his joining or his leaving.

6. His AOL home page has a link to a National Hang-Gliding Association and he once claimed to do that. However, he has never mentioned his glider, its make and model, nor where he glides, nor anyone he claims to know. We get a lot of INFERENCE but never any direct reference nor evidence. I am acquainted with a few hang-gliding enthusiasts here and they fly at only one location, have lots of pictures of themselves and others gliding.

>inthat post the Major Of Cap has choosen to fake a comincation from the
>US Army it itself. inded after this how can anything he has claimed
>about any DoD matter be trusted

Mark, we can't trust Major Dud in much of anything on news-groups. If you recall, Brian Burke and myself took him to task on the Department of Defense DIRECTIVE on the mission and organization of the Military Affiliate Radio System. Major Dud was unaware of that directive, refused to acknowledge it (yet was downloadable from the DoD by anyone), and kept claiming for the longest time that "amateurs directed MARS." They don't. DoD directs MARS. Always has.

After YEARS of claims of active-duty USMC service in here we haven't been presented with one shred of evidence from either official or unoffical sources that he ever did what he said was nor held the rank he claimed.

>It would seem that Robeson admits defeat for the monet by quiting the >feild here in USENET but he will most like be back after he thinks his >misdeeds are forgotten

"Nevah hoppen, GI." :-) [old Japlish exclamation of the 50s]

Major Dud will NEVER admit defeat nor will he EVER acknowledge a correction other than a typographical error. He is a BLUFFER and bluffers will simply try to misdirect any callings-out on errors or mistakes...or he will go into an emotional tirade of personal insults directed at his accusers. If that doesn't work, he MANUFACTURES "reasons" why his accusers do what they do (or don't do). False "reasons" supported only by his imagination.

Major Dud lives in a world where IMAGE IS EVERYTHING...rank, position, "official accreditation," activities of a macho nature, but, especially, his wishful thinking. He is King in that world and no one DARE dethrone him!

Major Dud WANTS ATTENTION. So much of the message content in here involves him and his disputes with others that, before the onslaught of the middle-school-mind filth-sayers, this news-group was rife with it. Hardly anything about amateur radio policy, just Major Dud and his "enemies" endlessly sparring, egged-on (also endlessly) by Major Dud hisself.

Yes, it would be good if he simply went away. He won't in my estimation. The Internet and Newsgroups are an excellent vehicle for his bluffing, inferences of "greatness", etc. He is SAFE there, isolated by time and distance, and thinks he can maneuver perceptions of himself by others by his claims and inferences. Unfortunately, he gets very upset emotionally by challenges and corrections and erupts in vitriolic behavior when confronted. Politeness disappears and he becomes abusive. [he accepts that for, after all, "kings" are allowed to act that way in his world]

Mark, watch for the responses from the Mighty Major on this post. :-) His actions will be as I've described. :-)

What dog is that? Do you believe that we have a dog with filed down teel?

The leader? Do you mean the Fearless Leader?

Do you like to think about people doing things in the back of a van,
Roger? Did anyone ever lock you up somewhere and do things to you?
Did you see something as a child which you weren't supposed to see?

Heh. I suppose I lied about taking photos of your cracker box. Perhaps I lied about visiting your house. Sure, Roger, the old gent exists. Two people confirmed that he exists and provided a name and the location of his home.

Naw, Rog, the State Department has no "flunky" job descriptions. I'm retired, I can spend as much time online as I choose. Yet you, with your unproven employment, seem to have much more time to post and hang out with your new elderly pal.

Prove that you have a job. Prove that you aren't on Disability Social Security.

"Yourt"?

Well, Rog, I suppose you wandered up the road and sought out human companionship. You couldn't, however, be friends with anyone non-existent. Your only non-existent friends are those you invent on the internet. Those are his supporters. They are legion. They are invisible. They are sock puppets.

You do? I'll bet you hear all sorts of things from the voices in your noggin. What's a "raod"?

"Yourt" "frioends" "meber"

Too bad you missed the ARES meeting, Rog. I was so looking forward to a long chat with you. Never mind though--I'll run into you one day and we'll have an exhange of views. I'll explain some things to you in a manner which you are sure to understand.

A kindly old widower would have me in court for what libel--that he is a
kindly old widower? You're absurd.

If you want to test your libel theory, try this one on:

Roger Wiseman of Glen Dale, West Virginia is mentally deficient.

There, now see what you can do with that.

I don't have an "ex-whore wife", Roger. My wife is certainly capable of stomping you though. You are extremely brave while posting filth anonymously on the internet. As has been amply demonstrated, you a cowardly humbug when confronted.

You belong in a mental institution where you can receive the treatment you need. They'd keep you away from computers and the ham bands. That way, you could do no harm to others and you could be safe from the others that you've had dealings with.

You aren't well and you prove it daily.

Yep, that's right. And I finally got curious enough to look up the actual regulation. According to section 15.225(a), intentional radiators at 13.553-13.567 MHz are allowed 15,848 uV/m at 30 meters, which is about 4.75 mW to an isotropic antenna in free space. There's also a 0.01% frequency stability requirement which would imply crystal control. And any emissions extending outside the band have to be about 54 dB lower, 30 uV/m at 30 m.

You can't believe that crap. # 1 your claim to fame is attacking the amp guy,thats it. Unless you count your countless attacks on rqz as a claim to fame.

And speaking of rqz, how stupid can you cb'ers really be? You are being used by a few hams to bother mark at every turn. What did he ever do to you people? His "crime" was to post and be try to be accepted as the ham that he is,just another person interested in radio.

Notice the crap thrown at Mark. The terrible remarks made about his family. Then, all of a sudden, the ham of the hour appears! MAGIC!!

Then Mark is further engaged in filthy remarks as you idiots sit by your screens and laugh. You must be very proud. Do you guys know you're being used or do you just enjoy the senseless attacks on a innocent man?

I think rqz has done more to further amateur radio than those filthy posting hams combined.

Also, you guys must be so proud of the website used to taunt mark with bibical quotes. That "church" were the "people" protesting at the funerals of American service people killed in Iraq.You fools should really get off the computer more often or at least read cnn or something along those lines. I'd bet you filth posting fools don't have a clue about that.

Go figure. An alliance of 13 and 20 wpm hams and freebanders.

So keep it up. Mark is more of a ham, not to mention more of a man, than you poor stupid followers will ever be.

Why, no, Roger. I'm sure that Mark's neighbors never contacted you
about my State Department job. I'm sure that my neighbors never
contacted you about my State Department job. Did your neighbors contact
you through the CDC or the State of Michigan about my State Department

Wouldn't it be "molested-by-your-dead-priest-daddy-when-he-was-alive"?

Well, Rog, contrary to your fantasies, my dad never molested me while he was alive and surely couldn't have done so after his death. Were you molested? Is that where all of this comes from? Is there anything you'd like to share with us? You might be near some sort of breakthrough.

Geeze, Lennie...after getting your nose rubbed in your
anti-civilian defense rants of over a year ago, can you not even get
the names of the organizations right?

And yes, there's SEVERAL ways to verify that someone is a member of
Civil Air Patrol.

And BTW...Who is "Major Dud"...?!?!

The flight suit is "somewhat used" from actually being worn by me
in the types of emergency services you only give lip service to.

There's no such office, Morkie. Nice try.

There's nothing to complain about, Morkie.

You have no "recourse" for any of the exchanges in this forum via
Civil Air Patrol.

As is clearly evident by CAP's snubbing of your "complaint".

Uh...No, Lennie...I never has a picture of me in a Tennessee State
Guard uniform on any webpage. And there's no such organization as the
"Tennessee State National Guard."

Again, you try to "diss" people for thier volunteer efforts, yet
can't even get the name of those organizations right!

And as has already been pointed out, there would be a unit history
in archives somewhere.

There's no archive on the "HMC 47th".

It never existed.

Of course you don't "care"...

Because with each day that you persist in insisting that you were
a member of the US Army attached to a unit that never existed, you look
all the more idiotic.

Reminding me that you claimed to have been atttached to a
non-existant (as in NEVER existed) Army Unit?

You're already a confrimed liar about your "Army Chemical Corps"

You originally said yo were part of a medical unit. That was the
context in which the inquiry was made...

However we STILL have you alledging to be part of a unit for which
there is NO evidence of having EVER existed, Morkie!

Ergo I can only surmise that you tried to bury your "unit" in the
history of one that DOES exist.

Good for you!

This fellow was from the Department of the Army...I assume that
the Department of the Army knows where ALL Army units are or were.

It doesn't matter.

I used to belong to Marine Heavy Helicopter Squadron 462 (The
Heavy Haulers, also known as "The Screw Crew") There are histories of
that unit from it's inception to it's present deployments.

Are you now suggesting that the Army is too incompetent to do the
same, Morkie?

I'm not claing the Army lied, Mork.

I am "claiming" that you gave GIGO. That a unit desiganted as the
214th seems to appear, Mr. Anders made a mistake. He'd have no reason
to lie. However YOU continue to do wo by insisting that you once
belonged to a unit that clearly NEVER existed.

sure you are

why would the army not know all of its brigade levl units
it takes less thean 2 minutes to find the 214th

your "letter" is a fraud you typed it yourself without checking the
facts

Indeed I might be willing to show you all pic of myself in My Feild jacket with the 214th emblem on it

which would prove pretty much I served or at least be a hell of a lot more evedence that you have ever posted

So if N9OGL's transmitions are legal power wise, he would basically be
broadcasting for the kids across the street. Maybe he could take song
requests. They can just shout out their front doors what songs they want
him to play.

I can copy perhaps 8 beacons on 13.555 MHz from all across the U.S.
Assuming they too are running the power level Roy calculated, N9OGL's beacon
should also be copyable.

Not true.
I have an AM "beacon" running some test groups smack dab
in the middle of the HiFer/ISM 22M allocation. At maximum power
I am at the legal limit. Most of my tests are -20dB from that level and
I
have copied my "becaon" from over 100 miles away twice. I was -6dB
down from max, and was rather shocked. Don't rule out the odd fluke
path.

If you ever hear a YL reading a set of word pairs each followed by
a ID nubmber in cut morse, that is my odd little station.

I normally keep the power -63dB down from max legal, and only boast
it while actually conducting tests.

Your spamline is spelled incorrectly and you consider that insignificant?
That's your bread and butter is it not? If I were to compare your amp with
your Usenet provider (Google LMFAO) then I would come to the conclusion that
your amp is a budget splatterbox POS with no frills...which it is. I think I
might post that nonsense "hard key " diagram in some of the ham groups and
see what kind of response you get. Face it Griffey, your amp is a
broadbanded splatterbox that couldn't hold a candle to a shitty ass Texas

lies like the 214th fa does not exist

then you compounded that lie by insiting that an employee of the DoD would not be able to look the existance of an entire brigade right and could still be trusted to have looked for a unit that once existed as a result of reorganizing other units and then was reopganized out existance again

if he could mis a curent brigade he could miss a reorganized battlion

You can't seem to find it...

Maybe we'll run across it in some Clancy novel you read about it
in...

There was no medical unit called the 214th, Morkie...YOU changed
your story to a "Field Artillery" unit after I busted your chops.

Only in your fantasies, Morkie...Or a Clancy novel that you read
while intoxicated and really do think you did it...In either case, it's
F I C T I O N A L! ! ! ! !

Sure I did.

And you got your chops busted.

Luckily you found a similar unit to match a part of it. Lucky for
you!

I read some of...What parts I could wade through.

I honestly thought it was impossible for you to butcher the
English language any worse than you already do, but by golly, you
proved me wrong!

I can almost buy off on your "typing too fast" in this forum and
being too lazy to go back and proofread your stuff here, but what's
your excuse for not doing it in the bolgs, Morkie?

Idiot.

stve you are claiming that a man that can find a current brigade can be
trusted to find the non existance of of a battlion in the past

you or he lied about the non existance of the 214th you are lying about
the non existance of the 47th

SOME QUOTES FROM ONE OF MORKIE'S "BLOGS"

what ever has happened to Hams
I First wrote a couple of week I stil basicaly stand by it. I have made at leaest a few contacts most likely before the jammer/bootlegger came on I beleive if I find I can't confrim any of them I am confident that my gear will do EME (in an effort ot work split I did "hear" echo of another qso meaning I can rea dhte largest stations and surley based on the eme literure I can make an eme contact even through such interference I ham seting up a sked to wrok in split mode with neither frq known to other till later in an effort to asure myself I have done what I set out to do

In response to my claim of my first EME contact someone in RRAP came back with "I doubt you can caluate the pathloos on an EME path (or words to that effect)

You know what I can't calualte that path loss

Indeed I would discourage anyone from trying to calculate it before trying the path what I have heard about those numbers is pretty discouraging

Why can I make such a contact when other say they can't or that I can't?

simple becuase I always KNEW I would, from the first monet I heard of EME contact which was from a question on Tech test back in 97 (I had heard a few days ebfore that No Code License existed I ordered the study but it arrived only the VE session so I tired the test cold KNOWING I would pass it then or next week or..) at the monent knowing nothing more than that such a contact was possible with my license I swore I would make one (or more)

I read the about the mode in detail and soon (in 97) realize I would likely have to wait awhile to keep that vow, but from time to time I renewed my efforts at first in data gathering a new milestone 2004 when I heard about the results with JT modes I began to pracetice with the early ones in terestial contact then last winter I learn of current jt65b mode and the details of the power and anttenna requiement abit of agonizing over wether I wanted to work with crushcrafts 31 foot 17b2

that I KNEW would work but that I have trouble steer or keeping safe in our harsh winters or the 13b2 I thought might work (and it did work like a charm, which it is in some sense of course) figuring I could always use it in terrestial modes and that I could later phase it with a second one and be assured of sucess then

but ALWAYS in mind was the KNOWLEDGE and assurance that I WOULD suceed and that even if I had failed now it was merely a lesson learned , part of paying my dues as it were

I knew I would one day be able to do it

I know anybody reading reading these words can do EME if they poccess 2 things

the will to reach for the Moon
the confindence to not count the obstacles

Amusing the way those that claim I am a nonenity are always trying to advance the notion I am not allowed to defend myself with deadly force

one can read it in the link but the readers degist abridged version amounts that wether or not the Castle doctrines apllies in a given (recent impending changes expand the castle doctrne in Michigan BTW http://www.migunowners.org/forum/showthread.php?t=15323) acitizen who is not the agressor is only required to retreat from a dangerous sitution in event he SAFELY do so. I point out in RRAP RRCB that I am able to walk easily and thus I would argue if one of these nuts jobs forced me to by getting himself shoot on my land that my ability to safely retreat is seriously limited if it exists at all, and second the threshold to cause me bodilyharm is lower than most becuase of the same health problems

in short since I have been forced to think i conclude that If come accroos a vandal on my land barring his imediate flight I will quickly exaust any option I have not to use force esp deadly force should it be at my disposal (after all I can't put ma shotgun if since he can better

The artillery unit obviously DOES exist.

When I busted your chops with the quote from my e-mail you
initially acknowledged that the unit was non-existant.

You subsequently found some other similar sounding unit.

However the unit you were allegedly attached to "CSB 47th PROV",
whatever that's supposed to be, NEVER EXISTED, ergo you were NEVER
attached to it!

Nothing I've written has been "stolen" from anyone, Mork.

You continue to blame me for outting you, but it was NOT me, but
Steve Adell, KF2TI, who did it, and did it very well.

By the way, he quoted your entire post including your e-mail addee

you were not given premission to quote

Indeed it is hardly mie ne to give according to QRZ you may not use
there site to harrass others

you violated the iright of access that you had there

No...from ONE Army site, Morkie.

That I have a better knowledge of where to to in the branch YOU
claim to have been in is ironic, I think.

Sure they do.

I did.

It was, afterall, for YOUR benefit!

True, I can't prove that anything unreal exists.

No one can.

But you're trying real hard to make the unreal real!

Got that name of the "widower" yet? What are "membership roles," hmmm?

square like you who longs for the opressive 1950's.

Who did you bring along to hide behind? You 'd never run into Roger,
you'd have to bring somebody else along. You wouldn't ever face him
alone, let alone doing something to him if you find him out alone. You
talk about underestimating people, you just did, hypocrite.

Now go whine to a certain "solicitor" (could this be the "old widower?") who has two DUI convictions (as reported in the Moundsville Echo and spent a 6 month home confinement on the last one) who shouldn't even be practicing law. I wonder if the Lawyer board in Charleston, WV who takes complaints on ethics knows?

So you admit he doesn't exist. There are no "widowers" in Roger's
neighborhood north of him. In fact there is a house with a couple and
two kids to the "North" than there is a mountain, Mt. Glen. You know
the one that hides that "velley."

You don't need to tell me the strengths of CW. I'm a CW advocate.
Just listen to the NCDXF beacons on 14.100. You can easily hear the 100mW
tone all over the world when there is propagation with a simple antenna.
I'm just saying the RF Todd is puting into his antenna has to be quit low
if he is transmitting legal power wise.

Smack dab in the middle of the HiFer/ISM allocation.
It is usually up on Saturday morning when I do some tests.

sure I can
at at least i assume the colpitts is no more complex than most of the
others

no understanding of the curcut is required to render a picture from
memory
indeed the only I or anyone else is going to know that ciruct x is a

You couldn't be more wrong. If there were practical exams for SSB, FM,
AM, FSTV, SSTV, RTTY (which is pretty darned old), packet, PSK, etc,
then it would be CRYSTAL clear that a Morse Code exam is valid.

However, there are no such practical exams for the other modes. So
there need be no exam for Morse Code, either.

That is not true. You wish to change the written exams, not add
practical exams for SSB, FM, AM, FSTV, SSTV, RTTY (which is pretty
darned old), packet, PSK, etc.

But if a practical exam is necessary for Morse Code, why isn't it
necessary for other modes? If all radio is merely plug and play, why
do the services still have radio schools (that aren't teaching Morse
Code)?

Who said that? We absolutely NEED relevant exams. That is my whole

There has never been a practical test to show that you could operate a
radio. Ever.

Then it hasn't changed much since you were first licensed.

W3RV didn't wait to get a ham license before operating! He just wanted

Lots of OFs on there who should know better. That's why I hold the

Not in Morse Code. If you must retain a Morse Code Exam, then you must
also administer practical exams for SSB, FM, AM, FSTV, SSTV, RTTY
(which is pretty darned old), packet, PSK, etc.

Correct. And no one has a right to force their favorite mode on
everyone else. Your days of doing so are numbered.

Hello Brian...long time no write... :-)

We've all seen the usual bluffing, lying, etc., by Major Dud, this
time on a slightly different subject. He expects us all to "take
his word on it (that it is true).

Poor "Major" Dud may have once seen an ancient mineographed

Poor feller Dud just doesn't understand, perhaps no know about,
the DSN and its header information, terminal software able to
identify civilians from military personnel on Internet tie-ins.

Heh heh heh.

MARS functions in existing units is still largely concerned with
morale services for unit personnel. It is hardly there to "back
up" any regular unit communications, much less be some key
ingredient in some pipe-dream "Homeland Defense Against Terrorists"
or other wild imaginings.

On putting together a photo essay of my own service days at a major
Army communications station

http://sujan.hallikainen.org/BroadcastHistory/uploads/My3Years.pdf
and /AlphabetSoup.pdf

I ran into the usual shoulder-shrugging "don't know" from a number
of official agencies at first, everyone from the Army's Center for
Military History to Fort Gordon's Signal Museum Historian's Office.

It took a LOT more digging and communicating with other agencies and units to get the final evolutionary path (including the USAF, I might add) of the 71st Signal Service Battalion of 1945 to the 78th Signal Battalion of today (based at Camp Zama, Japan, near Yokohama). It helped to have acquired a paper copy of my old battalion's own printing in 1962 describing the (then) updated station ADA and its mission, equipment, and history (to that date).

Even the Pacific Stars and Stripes military newspaper (HQ in Tokyo) helped with data. Ask nicely and it is surprising how helpful some can be. A not-quite-related sorce of information on Army communications turned up the fact that the old callsign "ADA" of Tokyo times in the '50s still exists and is now the HQ callsign of USARPAC, the United States Army, Pacific.

An even more detailed and comprehensive history of Army history (on Signal units) in Europe since 1945 ("USAREUR") is on-line at:

http://usarmygermany.com/Units/Signal/USAREUR_SignalCorps.htm

Heh heh, no. Neither historical agency has lists of fakers.

The only place where Robeson's "military career" could be verified or shown non-existant is NARA, the National Archives and Records Administration, and their massive military records archive in St. Louis. Getting such data requires a minimum knowledge of Robeson's social security number and proof of being a member of his family. NARA gives definitions of that and other necessary information to obtain individuals' records.

Since Robeson has refused to display even one item of official information, personal photograph while in-service, all on a claimed "18 year active duty" with the USMC, we have to conclude he NEVER HAD ANY SUCH ACTIVE DUTY TIME. The only photos he has had for claims of anything have been as a TN STATE Guard "1st Lieutenant" (scowling pose in cammies) or the infamous snot-on-moustache pose in a (used) flight suit with embroidered Captain's bars on the shoulders, as a member of the CAP. Not ONE single bit of information from EIGHTEEN YEARS claimed on active duty in the USMC.

The only conclusion possible is that Robeson is a fraud, an imposter, a wanna-be who never-was.

If Robeson makes fraudulent claims about 18 years of his life, what ELSE is he claiming fraudulently?

You betcha. Go to the K4YZ "detailed info" link and use the link at the end to access his home page. In that he claims a SECOND MARS station service, this time as THE NCOIC. Just more embellishment by the imposter.

Robeson needs IMAGE of his mighty and heroic accomplishments. Slathering on more embellishments (never before mentioned) seem to be a part of that.

>> Mark, watch for the responses from the Mighty Major on this
>> post. :-) His actions will be as I've described.

Tsk, tsk on me...I forgot to include Robeson's usual response and answer to things he can't prove as being "LIES" by the challenger. :-)

To him, it IS a "LIE." His fantasy world is made up differently than the reality we are all accustomed to...any departure from that fantasyland will SEEM like a "LIE" to him. Naturally he is disturbed about his fantasyworld being torn asunder.

We can all concentrate on the personal squabbles of a few, the anonymous middle-school-mentality-macho-wanna-bes happily talking dirty...OR...consider the FCC document release of 7 August 2006 on Access BPL. That's available at www.fcc.gov as FCC-06-113A1 in PDF or MS Word format.

That's a REAL Policy matter. But it's too difficult for those anonymous middle-school-mentality-macho-wanna-bes who would rather throw trash and dirty words on others.

Many "assume" that an Old Timer knows more than they actually know. Most Old Timers are guilty of this kind of thinking. Furthermore, many "assume" that newcomers to the hobby know little or nothing, and have no desire to learn. Most Old Timers are guilty of this klind of thinking.

A tape recorder is part of my shack. By the way, there's no exam on

Do what??? The power output can vary depending on a number of things including coax and antenna, you can run 1,000 watts and come up 10,000 uV/meter at a distance of 30 meters. As the FCC Office of Engineering and Technology has stated in their bulletin which deals with Part 15.

"What is the relationship between "microvolts per meter" and Watts? Watts are the units used to describe the amount of power generated by a transmitter. Microvolts per meter (µV/m) are the units used to describe the strength of an electric field created by the operation of a transmitter. A particular transmitter that generates a constant level of power (Watts) can produce electric fields of different strengths (µV/m) depending on, among other things, the type of transmission line and antenna connected to it. Because it is the electric field that causes interference to authorized radio communications, and since a particular electric field strength does not directly correspond to a particular level of transmitter power, most of the Part 15 emission limits are specified in field strength."

PART 15 in the CB band is 10,000 uV/meter @ 3 meter (100 mw).(Walkie
talkies and cordless phones are also 10,000 uV/meter @3 meters) While
on 13 MHz it's 10,000 uV/meter @ 30 meters or about 1.8 watts at 100
feet.

That's my point - there's no test any longer. For anything more than
the ability to memorize answers.

Add SSB, FM, etc., to the nothing there is today.

It's a lot more. The question isn't what ham radio is, it's whether
one should be required to pass a realistic test to get a license.

location.

What current exam? Memorizing answers and writing them down isn't a
test.

I doubt it - if I couldn't pass an Extra theory exam - a real one, not
the nonsense that passes for one these days - I'd lose my job in a
second.

Maybe we should have one - show the ability to put a clean PSK signal
on the air. Show the ability to interpret a waterfall display. Show
the ability to tell the difference between various digital modes. The
bands would be pretty QRM-free.

So you're in favor of exams that test knowledge of theory? "Draw the
schematic of ..."? "Explain why long path 2400 bps is impossible on
14 MHz"? That kind of relevance?

Or the "pick the answer with the resistor like we showed you in the
example" kind of relevance?

How do you draw a schematic and explain the functions of parts by
memorizing answers? You can't explain phase shift by memorizing "10k"

I'm advocating real testing for whatever mode. Right now the only
test is "do you have the fee, can you get to the testing place, and
have you memorized enough answers to pass". Let's have a test that
shows whether the testee knows anything. CW, APRS, AX25, PSK - all of
it. Or separate the licenses. You want to operate FM, you take a
test on FM and, if you pass, you get an FM license. Want to operate
SSB, you take a different test.

Not "want to get on the air? memorize some answers and pay your fee".

Most of those are the assumptions of newcomers about the assumptions

HAMS ACCUSE OMEGA ONE OF PIRACY!

One the USENETS (newsgroups) Amateur Radio Operators are accuse Omega One Radio of Piracy and have even gone as far as get on N9OGL BLOG http://n9oglvoice.blogspot.com and claim they have notified Riley Hollingsworth of the FCC of his "alleged" pirate activities. The truth is Omega One Radio is Legal. The power output of Omega One is 10,000 uV/ meter @ 30 meters(47 CFR Part 15.225). What's even worse is that this Ham operators are accusing someone of an illegal activity without even reading the rules and regulations. When Todd N9OGL, posted the rules those amateur's claimed "Just another cut and paste by Todd". The truth is most amateur radio operators don't know the rules, sometimes even their own rules. They believe that ALL radio transmitters and operators must be licensed by the FCC.They also believe that If you need to know about a rule or regulation that you have to be a lawyer or ask a lawyer to understand what those rules mean. This in term show how bad amateurs really are, it shows that amateurs want to play radio cop and jump the gun without reading and doing research on the matter. The fact is Omega One radio with it Part 15 power output is legal just like Wi-fi, Baby monitors, Cordless Phones, remote control toys and walkie talkies are legal because they too are Part 15.

Hello Brian,

You are engaging in old-time necro-equine flagellation here with
this "Al Klein." I suspect he will not buy rationality and come
back with more of the ARRL-taught-and-sponsored emotionalism
about radiotelegraphy.

The fact that the World Radio Conference of 2003 amened the amateur Radio Regulations seems to be lost to the brainwashed. Prior to July 2003 *all* nations *were*required* to administer International Morse Code proficiency tests to amateur radio license applicants. *All* No exceptions. After July 2003 *all*administrations* were free to test for morse or junk the test.

In mid-2003 the ONLY non-amateur radio service in the world that even bothered with manual radiotelegraphy were some ocean-going vessels who had not bothered to update to Data and SSB like the bigger ocean shipping concerns had already done for years.

Klein seems to be thinking the AMATEUR radio test "has" to be as "tough" as the commercial licenses. AMATEUR radio is about hobby pursuits, a pastime done for personal pleasure. It is NOT some professional activity (except in the minds of a few dwelling in fantasyland).

I've had a Commercial ticket since March, 1956, passing it at an FCC Field Office on first go. It didn't hurt that I'd already had three full years of big-station Army communications for prior experience.

The United States Army did NOT require me to "know CW" in order to keep 30 to 40 HF transmitters on the air or keep 9 24-channel microwave radio relay terminals operation 24/7. At the same time I had to be proficient in "destroying the enemy." That was in 1953 to 1956.

>> Those who want CW dropped just
>> want what they can't memorize dropped so they can get a ticket without

>
>So all ham radio is is Morse Code on HF? Or is it more than that?

It's "Working DX on HF with CW." :-)

ARRL has worked the CW thing to death ever since Hiram Percy went beyond the ionosphere over 70 years ago. Newington got brainwashed by "T. O. M." long ago and never went into detox.

>> No, I'm not addressing *where* the test is held at all - I'm

>
>Sounds like the Conditional License to me.

Klein really seems to want a Professional license exam for
AMATEUR activities!

Unless there's been a change in the Communications Act of 1934
and the Telecommunications Act of 1996 as of this Wednesday
morning, the FCC was NEVER EVER chartered to be an academic
institution.

Radio amateurs are AMATEURS by definition.

I can still remember my First 'Phone test. Took two hours. Four
parts to get a First. I recall four schematics...ALL on vacuum
tube circuitry. [this was in 1956 and there were NO RF power
transistors available anywhere]

Anyone who hasn't kept up with the state of electronics would be
totally LOST inside a modern HF transceiver...probably dumbfounded
by any HT using SMDs. :-)

[change band surgeons? :-)]

No problem for me on Klein's "challenge." I can name four more
basic oscillator circuits, draw them out, simulate their operation
in SPICE after calculating the values with a pocket calculator,
build the little suckers, adjust them, measure their characteristics
and even design-build impedance-interface networks for outputs.
Of course, the challenger has to PAY me for that...I AM a pro

and other folks have paid me for such services for a half century.

Ackshully, about half the commercial ticket questions were on
Rules and Regulations. The theory part was cursory to the subject
and not near enough complete to "qualify" for expertness in radio
or associated electronics. As I've seen since, they still ran
heavy for Rules and Regs for the next four decades. It should.
Not even the commercial ticket is any kind of "diploma" of
knowledge.

Not many tube Hartley oscillators used nowadays. :-)

I see more Yamahas than Hartleys... :-)

There is NO practical reason for a manual radiotelegraphy test
today. There is only the EMOTIONAL demand of some old-timers
for all to do as they had to do.

>There has never been a practical test to show that you could operate a
>radio. Ever.

Correct for the United States of America.

[waiting for someone to trot out the Russian amateur test...I'll
give them a year's subscription to The Daily Worker...:-)]

ABSOLUTELY TRUE, Brian! :-)

Heh heh, I'm one of the (chronological) Olde Fahrts and KNOW what
his generation's opinions ARE. God help me if I ever get as
stodgily self-righteous as some of them! :-(

>> >I've listened to emergency responders on a scanner before. They don't

>(which is pretty darned old), packet, PSK, etc.

Having once had a scanner to listen to (idly), civil aircraft pilots
and tower controllers get right up there on voice speech rates,
faster than most PLMRS Safety radio services (even police). Then
there are the UNtrained radio users such as harbor and inland
waterways communicators, the vast majority being untrained
(horrors!)
civilians (more horror!) communicating just fine on their store-
bought, usually-installed-by-others VHF voice radios.

The difference between them and amateurs is that the above are MORE
concerned about INFORMATION; amateur morsemen are much more
concerned about the MEDIUM, of USING Morse.

To paraphrase McLuhan a bit, "Their medium is their ego massage."

>> But an award for wanting has to do with "I want it so it's my right to
>> have it", which is what I'm talking about. No one has any "right" to
>> get on the air.
>
>Correct. And no one has a right to force their favorite mode on
>everyone else. Your days of doing so are numbered.

I think they expired long before WRC-03 was finished.

It seems that Klein and other Olde Fahrts are mostly looking for adulation by others for being so old in amateur radio. Their self-righteous attitudes stick out all over, demanding that "young folk" do what They had to do...or else. :-(

I could care less what was "expert" in radio in 1932. Two decades plus one after I was born I began using Big-Time HF radio communications and KNOW what was "expertise" from seeing (and emulating) the REAL experts of then. It was NOT morse code or manual radiotelegraphy as "best" a half century ago. Manual radiotelegraphy has been slowly dying towards obscurity ever since...but the chief media agency for ham radio in Newington still believes in it and promotes it constantly as "the best skill" in amateur radio to this day. A rather disgusting RETRO attitude of theirs in my opinion.

Klein really doesn't understand human history or humans, for that matter. EVERYONE has wanted "instant gratification" for something or other for all of recorded history. Even in amateur radio. Some companies in the 1920s were selling ready-built amateur radios, back when manual radiotelegraphy was about the ONLY mode available to the ham community. [that's 80 years ago, four generations, in case some of his contemporaries are afflicted with Alzheimers]

But, if Newington wants the test, then the test will remain. ARRL "represents 'all' amateurs," donut? :-) ARRL is Big Business (to the tune of a reported $15 million profit now) and Big Business SPEAKS. :-(

It appears to be your fetish, Rog. Every time someone says that you're

strange. I'll bet you go wild when someone tells of a squirrel

1. The FCC does NOT generate the questions on any amateur
radio license test. The VEC Question Pool Committee does.
By LAW the VEC QPC is composed of radio amateurs.

2. The FCC does NOT mandate the maximum number of questions
on any amateur radio license exam written test. The FCC
specifies only the MINIMUM number of questions. The VEC
QPC can generate as many questions as it cares to.

3. At some point a LARGE number of questions could defeat
even the most eidetic of humans, thereby destroying your
rant of "it isn't a real test because all can memorize
the questions-answers."

"Realistic test" = Collitch-level BS to make one a 1930's
radio expert? :-)

Define "realistic test" remembering that ALL the VEs are
also VOLUNTEER radio amateurs.

Oh, my, are you taking on the ENTIRE Academic Community now?

Last college-level course test I had required MEMORIZING

it and it wasn't a "real" test!

So, Al, what did you get for a license? A BS-HAM?

Define "real test," show your work.

WHAT "dishonest tactics," olde-tymer?

You've gotten rather self-righteous about "real" without giving
any real answers as to what defines "real."

You got stomped on, par for the newsgroup course. If you don't
like disagreements over your disagreeability, try another venue.

>Quit putting words in my mouth. I wasn't complaining to anyone, and

Self-righteousness is readily transparent...

You did NOT answer Brian's question.

Does self-righteousness negate having to answer questions?

Now you are putting words in Brian's mouth. Tsk, tsk.

Explain how the VEs will love and embrace your collitch-level
AMATEUR radio license exam, needing hours per test applicant.

In case you hadn't been up to speed, the FCC does NOT normally
do any testing of either Commercial or amateur radio licenses.
That's been privatized.

If you wish to change AWAY from privatized testing, you have
ready access to the Proposal method with the FCC. They explain
the whole process.

Gosh, olde-tymer, did the ham exams of a half century ago get
into vectors and phases? I had none of that in my First 'Phone
exam. I missed a collitch-final kind of exam? :-)

Soldiers and Airmen weren't "given" radios. They were ISSUED them.
A half century ago you had damn well take CARE of them or you HAD
to pay for them! By the way, the FCC does NOT regulate federal
government radio use...the NTIA does that, for both federal folks
and military personnel use.

I can give you a brief summation of the "instruction" in using
an AN/PRC-6 HT: About 10 minutes, word of mouth and hands-on
"training." A VHF radio transceiver, it wasn't designed for
AMATEUR radio activities. It couldn't be...didn't have any
place to plug in a code key. :-)

I can easily remember the "training" on lots of other real radios
in the military plus a few more as a civilian working on DoD
contract projects. The AN/PRC-119 took a lot longer, especially

for the Hopset entry. [I had to learn it from its big TM] You
familiar with the PRC-119? A quarter-million of them have been
built. All the military branches have them.

>When I was licensed you had to show an understanding of theory, by
>answering questions that were more than just multiple choice from a
>published answer pool.

Sunnuvagun! In 1956 one of the four parts I successfully
completed was MULTIPLE-CHOICE! How about that? :-)

But that was at an FCC Field Office. 80 miles away in Chicago.
No "conditionals" for Commercials then, senior. "Privatized
testing" would be a laughable subject in '56. :-)

I have no problem with understanding Brian...and I HAVE been
around radio communication for a rather long time. Try asking
me about "efficiency" or "throughput" on any mode, any radio
service.

Can you explain where all the other radio services got their
"training" in radio use? If any at all, that is. You can't
find any other radio service users who get NO "training"
whatsoever nor need anything but an equipment license to use
it? [I'm not talking about CB]

I daresay a whole bunch of VEs would argue with you after
spending HOURS separately with each test applicant for
one of those "realistic test" ideas of yours.

>
>Not "want to get on the air? memorize some answers and pay your fee".

Tsk, tsk. Plan out a "real test" and then get an estimation
of the TIME it would take for each VE and each license
applicant. Remember that US amateur radio licensing is now
an ALL-VOLUNTEER process. Just WHO are you expecting to PAY
for all the equipment necessary to do your "real testing" on
ALL modes now allocated to US radio amateurs? Government?
VEs? Who will be responsible for their maintenance?

[this group has ALREADY beaten that subject to death in here]

You will have to Petition the FCC for a drastic change in
the number of "endorsements" to the various parts and classes.
You will have to get in touch with the VEC QPC to change the
number of written test questions.

I don't think you will do anything, just sit in here and blow
off steam like the usual self-righteous Olde-Tymer. Geez.

US amateur radio is "working DX on HF with CW." Know CW and
you don't need any theory or other BS. Ipso facto. [or
something fancy in Latin to show 'book-larnen'...:-)]

Not when YOU were allegedly on Active Duty, Mork...

Ya shudda done some more research, fatboy, and picked a unit that
was around when YOU claim you were on duty.

Only if that includes being the pitman behind the knotty-pine hole
in the men's latrine at the local gay bar, Mork.

So far you've come up with a lot of "sound's alike" stories about
Ft Sill, but can't seem to find a SINGLE reference to ANYthing that
puts you there.

You can't even get the unit designations straight any two posts in

On the contrary, the Conditional was the General Class
license given away from an FCC office. At the time I got
mine, the distance from an FCC office was set at 75 miles.
Quoting the 1957 ARRL License Manual: "The Conditional
Class license conveys privileges identical to those of
the General Class ..." which incidentally at the time,
was all amateur frequency operating privileges.

Nope, if your name was part of their records, then you didn't serve at
all. Because the unit you claim to be with didn't exist.

I guess you missed it...

Toiddie was "graduating" at the end of "that" semester when he
joined us here...That was about 18 months ago or more now...

But really, I bet the only thing he's ever "attended" at a college
was the men's room...You know...the guy who passes out toiletries and
fresh towels, and gives you a mint if you leave a tip...?!?!

C'mon, Todd. He qualified it by saying "4.75 mW to an isotropic antenna in free space." It is just a way to get a "feel" for how much power might be required based on the FCC uV/m limit under certain theoretical conditions.

I would start with a calculation like this if I were designing a transmitter whose signal has to meet those limits. I think that would be better than starting with a 1000W transmitter when only a few milliwatts is required.

When was the last time you used an isotropic antenna? How was your trip to free space?

You are wrong about the FCC limits on 13 MHz. There is no mention of 10,000
uV/m. Here are the limits:

Sec. 15.225 Operation within the band 13.110-14.010 MHz.

(a) The field strength of any emissions within the band 13.553-

13.567 MHz shall not exceed 15,848 microvolts/meter at 30 meters.

(b) Within the bands 13.410-13.553 MHz and 13.567-13.710 MHz, the

field strength of any emissions shall not exceed 334 microvolts/meter at

30 meters.

(c) Within the bands 13.110-13.410 MHz and 13.710-14.010 MHz the

field strength of any emissions shall not exceed 106 microvolts/meter at

30 meters.

You are also wrong about the power level required to achieve these limits.
The power required is much lower.

John

There appear to be two sets of part 15.225 rules floating around.
<http://frwebgate.access.gpo.gov/cgi-bin/get-cfr.cgi?TITLE=47&PART=15&SECTION=225&YEAR=200
1&TYPE=TEXT>
shows:
"[Code of Federal Regulations]
[Title 47, Volume 1]
[Revised as of October 1, 2001]
>From the U.S. Government Printing Office via GPO Access
[CITE: 47CFR15.225]

[Page 726]

TITLE 47--TELECOMMUNICATION

CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION

PART 15--RADIO FREQUENCY DEVICES--Table of Contents

Subpart C--Intentional Radiators

Sec. 15.225 Operation within the band 13.553-13.567 MHz.

(a) The field strength of any emissions within this band shall not exceed 10,000 microvolts/meter at 30 meters.
(b) The field strength of any emissions appearing outside of this band shall not exceed the general radiated emission limits shown in Sec. 15.209.
(c) The frequency tolerance of the carrier signal shall be maintained within <plus-minus>0.01% of the operating frequency over a temperature variation of -20 degrees to +50 degrees C at normal supply voltage, and for a variation in the primary supply voltage from 85% to 115% of the rated supply voltage at a temperature of 20 degrees C. For battery operated equipment, the equipment tests shall be performed using
a new battery."

And
<http://www.fcc.gov/Bureaus/Engineering_Technology/Documents/bulletins/oet63/oet63rev.pdf>
Also shows the 10,000uV/M at 30M

Yet <http://www.sss-mag.com/pdf/part15-91905.pdf>
Dated sept 2005, shows the limits you quoted.

What is troubling is the FCC has different specs on different documents at fcc.gov.

Buy regardless of runinng 10,000uV or 15,848uV, one does NOT need a 100W
transmitter to reach either of these levels. I have a 2W unit followed by a step attenuator
coupled to a bufffer with a Zin of 50 Ohms and a Z Out of ~500. The buffer transistor
is a 250mW and isn't even warm. This was the only easy way to allow the attenuator
to accurately step the power level down. By the 15,848uV I guess I could increase
my power from 5,000uV, to allow for the energy in the sidebands, to something like
10,000uV.

Oh whoopy gea!

Too much trouble to even think about changing as I had to back the exciter down to something like 1/2W to reach the 5,000uV level.

Crystal Oscillator-buffer#1-amplifier-?20dB pad-step attenuator-buffer#2-matching-
very poor radiator.

I would guess I am running maybe 5mW into a modified CB ground plane antenna.
Serious mismatch, but my "beacon" was only intended to reach about 1 mile.
For an S2 reading I had to back the power down ~50% from max legal. So assume I am running 2.5mW with no attenuation, so for extra credit, what is my
power level at -63dB?

I found the Url posted it in another thread along with the note from
that iit takes up 6 months to retrieve a units histroy for the ARMY so
steve has to have been lying in saying some could come up with in only
a few days

BTW the timelines also prove steve is lying when he claims you can
call the military and find proof of his service

well I suppose you can but you need to be on hold for about 6 m0onths
